both marine and freshwater fish. It identifies various players, especially traders who take part in the product flow, irrespective of the impact each of them has on the value provided to the end customer. While members of the supply chain include all individuals or organisations between whom interaction takes place, directly or indirectly from the point of production to consumption, this study also distinguishes between primary and peripheral members to make a complex network more manageable. Moreover, the book provides a comprehensive analysis of the emerging marketing channels- both organised and unorganised- in this highly perishable food segment. It provides important insights into the current scenario, focusing on the emergence of newer forms of marketing such as multinationals and e-retailing, while highlighting how traditional forms such as 'mom-and-pop' shops have continued to sustain, despite the challenges they face. The findings from India are also compared to global experiences of other fish producing and exporting countries such as Bangladesh, Indonesia, and Thailand to offer a comparison of the differences and similarities in the supply chains of various countries. The book provides important takeaways for researchers and PhD scholars working in the area of fisheries as well as supply chains. Since this book is based on field visits to different parts of the country it brings out the ground realities along with interesting insights and important policy implications for the sector, and should, therefore, appeal to policymakers as well.

This book is one of the first critical analyses of the automobile industry in India. It

studies the sector in general and the passenger car industry in particular, and provides valuable insights into the operation of Foreign Direct Investment (FDI) companies in a technology-intensive industry under changing economic regimes. The volume underlines the influence of the changing nature of foreign investment, the impact of economic reforms, technology regimes and industrial policy on growth, structural changes and development. It offers a detailed account of the trade performance of manufacturers in India's passenger car industry. It also looks at successful cases to draw policy lessons towards encouraging quality FDI and developing India as a base for world production. A useful addition to industry studies in India, this book with its wide coverage and contemporary analyses will interest scholars and researchers of economics, Indian economy and industrial policy, industrial economics, automobile industry and manufacturing sector, development economics and international economics. It will also appeal to policymakers, practitioners and industrial associations.

This book asks fundamental questions about the extent to which India is participating in the global shift towards knowledge-based forms of competitiveness. It charts Indian performance and progress using a unique framework benchmarked against fourteen other countries. In the course of the analysis, critical areas for improvement are identified, and the book provides detailed and objective insights for policy-makers and researchers to facilitate change and institutional reform in India. Readers will derive a comprehensive understanding of India's performance and prospects as it

This book examines the linkages between exchange rates and India ' s merchandise trade since the 1990s. It looks at India ' s trade in the post-liberalisation period through its two main components: commodities and trading partners, and provides a bird ' s eye view through aggregate analyses accompanied by a historical narrative of the evolution of trade and exchange rate dynamics. Presenting a comprehensive analysis of bilateral and product-specific trade, the book explores the impact of exchange rate on labour intensive sectors and charts out major development. It also offers compelling evidence to suggest that if some commodities are identified as integral to India ' s export plans, then the impact of exchange rate must be weighed by the Reserve Bank of India (RBI) prior to a market intervention. This timely volume will be of interest to scholars and researchers of economics, business and finance,

This book is a comprehensive examination of the Indian textile industry and the various determinants affecting its export performance, trends in labour, and capital productivity in the post-liberalization years. Employing 45 million people, including skilled and unskilled workers, the Indian textile and clothing industry occupies a significant position in the Indian economy in terms of industrial production, employment, and exports. This work traces the growth and expansion of this industry in the post-reform period and studies its contributions to the economic development of the nation. It discusses global trade agreements, India ' s share in international exports, and its major trading partners across the globe including the USA, UK, UAE, Germany, China. It also provides recommendations to Indian policy makers for a possible improvement in the textile exports across the globe. The Textile Industry and Exports in Post-Liberalization India will be of interest to students and researchers of politics and international relations, economics, development studies, labour economics, sociology and social policy, and South Asian studies.

This book systematically evaluates the trajectories of Special Economic Zones (SEZs) policymaking in India and its performance. The findings of the study are the

result of detailed fieldwork conducted by the author in India and China at different points in time. Exploring China's SEZs policy and performance, the book discusses whether Indian policymakers were aware of the nuances of China's SEZs policy and the various facets of performance before replicating it for India. Performance analyses of Indian SEZs are carried out using both a conventional set of performance indicators and new frameworks, such as the zone trade performance index, the resource cost framework and efficiency analysis. Offering a balanced view to rate the performance of Indian SEZs, the significance of this study lies in its quest to provide an holistic appraisal of the various unexplored issues in the literature pertaining to SEZs in India.
