Teaching in the Fast Lane offers teachers a way to increase student engagement: an active classroom. The active classroom is about creating learning experiences differently, so that students engage in exploration of the content and take on a good share of the responsibility for their own learning. It's about students reaching explicit targets in different ways, which can result in increased student effort and a higher quality of work. Author Suzy Pepper Rollins details how to design, manage, and maintain an active classroom that balances autonomy and structure. She offers student-centered, practical strategies on sorting, station teaching, and cooperative learning that will help teachers build on students' intellectual curiosity, self-efficacy, and sense of purpose. Using the strategies in this book, teachers can strategically "let go" in ways that enable students to reach their learning targets, achieve more, be motivated to work, learn to collaborate, and experience a real sense of accomplishment.

It ranks right up there with public speaking. Nearly all of us fear it. And yet it is critical to our success. Asking for money. It makes even the stout-hearted quiver.But now comes a book, Asking: A 59-Minute Guide to Everything Board Members, Staff and Volunteers Must Know to Secure the Gift. And short of a medical elixir, it's the next best thing for emboldening you, your board members and volunteers to ask with skill, finesse ... and powerful results.Jarold Panas, who as a staff person, board member and volunteer has secured gifts ranging from \$50 to \$50 million, understands the art of asking perhaps better than anyone in America. He knows what makes donors tick, he's intimately familiar with the anxieties of board members, and he fully understands the frustrations and demands of staff.He has harnessed all of this knowledge and experience and produced a landmark book.What Asking convincingly shows -- and one reason staff will applaud the book and board members will devour it -- is that it doesn't take stellar sales skills to be an effective asker. Nearly everyone, regardless of their persuasive ability, can become an effective fundraiser if they follow a few step-by-step guidelines.You have to know your cause, of course, and be committed to it. But, as important, you have to know how to get the appointment, how to present your case, how to read your donor's words, how to handle objections, how to phrase your request, and even what behaviors to avoid.

"A QUICK BUT THOUGHTFUL LOOK INTO THE PROS AND CONS OF GAMIFICATION..."--Daniel H. Pink, Author, DriveWhy can't life--and business--be fun?For thousands of years, we've created things called games that tap the tremendous psychic power of fun. In a revised and updated edition of For the Win: The Power of Gamification and Game Thinking in Business, Education, Government, and Social Impact, authors Kevin Werbach and Dan Hunter argue that applying the lessons of gamification could change your business, the way you learn or teach, and even your life. Werbach and Hunter explain how games can be used as a valuable tool to address serious pursuits like marketing, productivity enhancement, education, innovation, customer engagement, human resources, and sustainability. They reveal how, why, and when gamification works--and what not to do. Discover the successes--and failures--of organizations that are using gamification: How a South Korean company called Neofect is using gamification to help people recover from strokes; How a tool called SuperBetter has demonstrated significant results treating depression, concussion symptoms, and the mental health harms of the COVID-19 pandemic through game thinking; How the ride-hailing giant Uber once used gamification to influence their drivers to work longer hours than they otherwise wanted to, causing swift backlash. The story of gamification isn't fun and games by any means. It's serious. When used carefully and thoughtfully, gamification produces great outcomes for users, in ways that are hard to replicate through other methods. Other times, companies misuse the "guided missile" of gamification to have people work and do things in ways that are against their self-interest. This revised and updated edition incorporates the most prominent research findings to provide a comprehensive gamification playbook for the real world.

If you are a teacher of grades K-6, you might be asking, "Should I teach grammar in my class on a daily basis? How would I go about doing this? And how can I teach grammar so it isn't boring to my kids?" In Grammar Matters, Lynne Dorfman and Diane Dougherty answer these questions and more. Using mentor texts as the cornerstone for how best to teach grammar, this book provides teachers with almost everything they need to get kids not only engaged but excited about learning grammar. Divided into four parts--Narrative Writing, Informational Writing, Opinion Writing, and Grammar Conversations--this hand reference provides practical teaching tips, assessment ideas, grammar definitions, and specific mentor texts to help students learn about parts of speech, idioms, usage issues, and punctuation. Through "Your Turn Lessons," conversations, conferences, and drafting, revising, and editing exercises, students will learn not only specific concepts but also how to reflect upon and transfer what they have learned to other writing tasks, no matter the subject. The "Treasure Chest of Children's Books" provides an extensive list of both fiction and nonfiction books that fit naturally into grammar instruction. Eight appendices provide even more resources, including information on homophones, using mentor texts to teach grammar and conventions, checklists, comma rules, help for ELL students, and a glossary of ramar terms. Grammar Matters links instruction to the Common Core State Standards and features quality, classroom-tested tools that help teachers provide their students with the gifts of grammar and literacy.
