This book is written for young students in high schools and normal schools. No knowledge can be of more use to a young person than a knowledge of himself; no study can be more valuable to him than a study of himself. A study of the laws of human behavior, --that is the purpose of this book. What is human nature like? Why do we act as we do? How can we make ourselves different? How can we make others different? How can we make ourselves more efficient? How can we make our lives more worth while? This book is a manual intended to help young people to obtain such knowledge of human nature as will enable them to answer these questions. I have not attempted to write a complete text on psychology. There are already many such books, and good ones too. I have selected for treatment only such topics as young students can study with interest and profit. I have tried to keep in mind all the time the practical worth of the matters discussed, and the ability and experience of the intended readers.

Dive into the compelling mystical world of the Healer series by New York Times bestselling author Maria V. Snyder. Laying hands upon the injured and dying, Avry of Kazan absorbs their wounds and diseases into herself. But rather than being honored for her skills, she is hunted. Healers like Avry are accused of spreading the plague that has decimated the Fifteen Realms, leaving the survivors in a state of chaos. Stressed and tired from hiding, Avry is abducted by a band of rogues who, shockingly, value her gift above the golden bounty offered for her capture. Their leader, an enigmatic captor-protector with powers of his own, is unequivocal in his demands: Avry must heal a plague-stricken prince—leader of a campaign against her people. As they traverse the daunting Nine Mountains, beset by mercenaries and magical dangers, Avry must decide who is worth healing and what is worth dying for. Because the price of peace may well be her life... Originally published in 2010

This New York Times –bestselling author ' s memoir of her own heart attack is " a refresher course in handling life ' s meanest challenges with grace " (Library Journal). It begins late one afternoon in her kitchen. There is no collapse, no massive pain. Just a slight fluttering sensation in her chest, then chills, and finally, nausea. Probably nothing to worry about, the doctor assures her on the phone. It doesn ' t sound like a heart attack. But it is. Heart attacks in women can look and feel dramatically different than they do in men, which is why they often go undiagnosed. But heart disease is the number-one killer of American women—greater than all forms of cancer combined. When the doctor examines Lear the day after her episode, the verdict is shocking. So begins an account, filled with grace, humor, and ferocity, of her hard-won return to good health, beset by mysterious postsurgical complications and haunted by memories of her late husband when she finds herself in the same coronary unit in which she lost him all those years ago.
