A Climate For Change Global  
In A Climate for Change, the authors tactfully and forcefully make the case to skeptical conservative Christians that (1) climate change is real and (2) Christians should be working in this issue for myriad faith-based reasons. Katherine Hayhoe and Andrew Farley are spouses teaching at Texas Tech here in my beloved Lone Star State.

A Climate for Change: Global Warming Facts for Faith-Based ...

Within scientific journals, global warming refers to surface temperature increases while climate change includes global warming and everything else that increasing greenhouse gas levels affect. [5] A related term, climatic change , was proposed by the World Meteorological Organization (WMO) in 1966 to encompass all forms of climatic variability on time-scales longer than 10 years, but regardless of cause.

---

Climate variability and change - Wikipedia

Most of these climate changes are attributed to very small variations in Earth’s orbit that change the amount of solar energy our planet receives. Scientific evidence for warming of the climate system is unequivocal.

Ambitious corporate climate action - Science Based Targets

The scientists modeled the effect of greenhouse gas emission reductions on changes in the Earth’s climate from 1850 to 2500 and created projections of global temperature and sea level rises.

---

Climate change study: Reducing greenhouse gases won’t stop ...

Climate is influenced by a multitude of factors that operate at timescales ranging from hours to hundreds of millions of years. Many of the causes of climate change are external to the Earth system. Others are part of the Earth system but external to the atmosphere.

---

Climate change - Evidence for climate change | Britannica

Most Americans recognize climate change, but some are still unsure about its causes. Tens of thousands of scientists in more than a hundred nations have amassed an overwhelming amount of evidence pointing to a clear conclusion: Humans are the main cause. We’re the ones who burn fossil fuels, produce livestock and clear trees, increasing the amount of heat-trapping gases in the atmosphere.

Jeff Bezos — longtime climate-change offender and now a ...

In order to stabilize the climate change that is being driven by global warming, mitigation efforts seek to reduce the concentration of greenhouse gases in the atmosphere. In the words of the IPCC, “Mitigation efforts over the next two to three decades will have a large impact on opportunities to achieve lower stabilization levels.”
