Abstract—This paper extends Crammer and Singer's multiclass SVM to use L2 (squared hinge) loss. Although derivations and algorithms are similar to those of using L1 hinge loss, we present all details for future references. In

Loss Function In  
Machine Learning  
Generally, L2 Loss  
Function is  
preferred in most of  
the cases. But when  
the outliers are  
present in the

dataset, then the L2 Loss Function does not perform well.

The reason behind this bad performance is that if the dataset is having outliers, then because of the consideration of the squared differences, it leads to the much larger error. Hence, L2
