How new practices can improve your performance in life after COVID-19. The essence of this book is to help and inspire people to adapt smoothly to the new «post-Covid World», the «new normal», as well as helping them improve other aspects of their lives. As an example, companies have been testing and adapting to new ways of working in order to improve employee performance, optimize outputs and reduce costs such as acquiring new communication tools, collaboration tools, virtual desktops as a service, and more. Some companies implemented what is called «flexiwork», which is a hybrid mode that allows employees to work a few days from home with pre-notice, depending on the company's policies. Due to Covid-19, all of these changes have been accelerated with incredible speed and even more incredible dimensions. During Covid-19, all of us have suffered an extreme lockdown that enforced the adoption of these tools and remote work. This is especially true for roles that can be done with a good laptop and strong internet connection. You will be surprised how much more you could accomplish in a short period of time, giving you the momentum that you need to keep setting greater goals in your personal and professional life. This book will help you to improve those important aspects in life.

Art and Adaptability argues for a co-evolution of theory of mind and material/art culture.

Individual adaptability to changes at work refers to an individual's response to new demands or ill-defined problems created by uncertainty, complexity, mergers, and any rapid change in the work situation. Today, one of the key factors for an individual's success is said to be adaptability. In the past two decades there has been increasing interest in the research on individual adaptability, and this is one of the first academic volumes to look at this important topic. Specific contexts examined include work-family conflict, retirement, career management and intercultural interaction at the workplace. The book will provide a comprehensive and integrated analysis of the conceptual, assessment and contextual issues that will help identify the current trends and emerging themes in adaptability research.

This is not a book about one thing. It's not a 250-paged dissertation on leadership, teams or motivation. Instead, it's an agenda for building organizations that can flourish in a world of diminished hopes, relentless change and ferocious competition. This is not a book about doing better. It's not a manual for people who want to tinker at the margins. Instead, it's an impassioned plea to reinvent management as we know it—to rethink the fundamental assumptions we have about capitalism, organizational life, and the meaning of work. Leaders today confront a world where the unprecedented is the norm. Wherever one looks, one sees the exceptional and the extraordinary: Business newspapers decrying the state of capitalism. Once-innovative companies struggling to save themselves. Next gen employees shunning blue chips for social start-ups. Corporate miscreants getting pilloried in the blogosphere. Entry barriers tumbling in what were once oligopolistic strongholds. Hundred year-old business models being rendered irrelevant overnight. Newbie organizations crowdsourcing their most creative work. National governments lurching towards bankruptcy. Investors angrily confronting greedy CEOs and complacent boards. Newly omnipotent customers eagerly wielding their power. Social media dramatically transforming the way human beings connect, learn and collaborate. Obviously, there are lots of things that matter now. But in a world of fractured certainties and battered trust, some things matter more than others. While the challenges facing organizations are limitless; leadership bandwidth isn't. That's why you have to be clear about what really matters now. What are the fundamental, make-or-break issues that will determine whether your organization thrives or dives in the
