Don't Panic! This workbook is designed to help you to overcome your fears about astrology math. If you didn't have at least some fears about learning how to calculate charts by hand, you wouldn't be reading this book. This is nothing to be ashamed of. Unless you have kids in high school, the last time you were presented with an algebra problem was probably when you were in high school. And face it: you probably hated it then, too. This will be much easier for you than it was in high school. For one thing, you're allowed (and even expected) to use a calculator here. Math is, in fact, your friend. Granted, it's the kind of friend that wakes you up in the middle of the night, raids your refrigerator and then passes out on your living room floor, but it's still your friend. And if you're serious about learning astrology, you do have to be able to do the math-or at the very least understand how the math is done. This workbook will teach you all of the astrology math you will ever need.

This book has a nonstandard choice of topics, including material on differential galois groups and proofs of the transcendence of e and pi. The author uses a conversational tone and has included a selection of stamps to accompany the text.
