This long-awaited biography of Alfred Jarry reconstructs a life both "ubuesque" and pataphysical. When Alfred Jarry died in 1907 at the age of thirty-four, he was a legendary figure in Paris—but this had more to do with his bohemian lifestyle and scandalous behavior than his literary achievements. A century later, Jarry is firmly established as one of the leading figures of the artistic avant-garde. Even so, most people today tend to think of Alfred Jarry only as the author of the play *Ubu Roi*, and of his life as a string of outlandish "ubuesque" anecdotes, often recounted with wild inaccuracy. In this first full-length critical biography of Jarry in English, Alastair Brotchie reconstructs the life of a man intent on inventing (and destroying) himself, not to mention his world, and the "philosophy" that defined their relation. Brotchie alternates chapters of biographical narrative with chapters that connect themes, obsessions, and undercurrents that relate to the life. The anecdotes remain, and are even augmented: Jarry's assumption of the "ubuesque," his inversions of everyday behavior (such as eating backward, from cheese to soup), his exploits with gun and bicycle, and his herculean feats of drinking. But Brotchie distinguishes between Jarry's purposely playing the fool and deeper nonconformities that appear essential to his writing and his thought, both of which remain a vital subterranean influence to this day.

This book explores the contribution of and art and creativity to early education, and examines the role of the atelier (an arts workshop in a school) and atelierista (an educator with an arts background) in the pioneering pre-schools of Reggio Emilia. It does so through the unique experience of Veà Vecchi, one of the first atelieristas to be appointed in Reggio Emilia in 1970. Part memoir, part conversation and part reflection, the book provides a unique insider perspective on the pedagogical work of this extraordinary local project, which continues to be a source of inspiration to early childhood practitioners and policy makers worldwide. Veà's writing, full of beautiful examples, draws the reader in as she explains the history of the atelier and the evolving role of the atelierista. Key themes of the book include:

- processes of learning and knowledge construction
- the theory of the hundred languages of childhood and the role of poetic languages
- the importance of organisation, ways of

humanists as obsessively bookish and allergic to labor. In this celebration of bookmaking in all its messy and intricate detail, renowned historian Anthony Grafton invites us to see the scholars of early modern Europe as diligent workers. Meticulously illuminating the physical and mental labors that fostered the golden age of the book—the compiling of notebooks, copying and correction of texts and proofs, preparation of copy—he shows us how the exertions of scholars shaped influential books, treatises, and forgeries. *Inky Fingers* ranges widely, tracing the transformation of humanistic approaches to texts in the seventeenth and eighteenth centuries and examining the simultaneously sustaining and constraining effects of theological polemics on sixteenth-century scholars. Grafton draws new connections between humanistic traditions and intellectual innovations, textual learning and craft knowledge, manuscript and print. Above all, Grafton makes clear that the nitty-gritty of bookmaking has had a profound impact on the history of ideas—that the life of the mind depends on the work of the hands.
