Infinite Shapes - Animal Shapes  
Limits on Animal Size and Shape. Animals with bilateral symmetry that live in water tend to have a fusiform shape: a tubular shaped body that is tapered at both ends. This shape decreases the drag on the body as it moves through water and allows the animal to swim at high speeds. Certain types of sharks can swim at fifty kilometers an hour ...

Have you ever wondered what to do when a snake bit you? What if it is an animal you have never seen before? What if that plant is poisonous? Chicago residents need have no fear. In this new guide, Lynne Bachleda showcases the animals, places, and potential diseases that readers could encounter in the Chicago area. Bachleda touches on the mammals, birds, reptiles, amphibians, insects, arachnids, and flora that Chicago has to offer and she doesn't stop there. In this book, Bachleda explains how to keep safe and what to do in case you are injured by an animal or contract a disease from an animal or plant.

Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

The eye is a complex sensory organ, which enables visual perception of the world. Thus the eye has several tissues that do different tasks. One of the most basic aspects of eye function is the sensitivity of cells to light and its transduction though the optic nerve to the brain. Different organisms use different ways to achieve these tasks. In this sense, eye function becomes a very important evolutionary aspect as well. This book presents the different animal models that are commonly used for eye research and their uniqueness in evaluating different aspects of eye development, evolution, physiology and disease. \* Presents information on the major animal models used in eye research including invertebrates and vertebrates \* Provides researchers with information needed to choose between model organisms \* Includes an introductory chapter on the different types of eyes, stressing possible common molecular machinery
