Assignment 5; Due Friday, October 28 6.6a Imagine that $X \times Y$ has some unspecified topology. Suppose $X \times Y \rightarrow X$ is continuous and let $U \subset X$ be open. The inverse image of this set is $U \times Y$; by continuity this set is open. Similarly if $X \times Y \rightarrow Y$ is continuous and $V \subset Y$ is open, then $X \times V$ is open. If both maps are continuous, then $U \times V \subset X \times Y$

Assignment 5; Due Friday, October 28

Assignment 5, Due Friday, Oct. 7 Exercise 2.4.3*: Use the Subsequence Rules to prove that the following sequences are divergent: (a) $(n+1)/n^2$; (b) $n/(n^2 - 2n^2 + 1)$. Exercise 2.5.1*: Prove that if $\{f_n\}$ is increasing and has a subsequence $\{f_{n_k}\}$ which converges, then $\{f_n\}$ converges.

Exercise 2.5.2*: Let (a_n) be a sequence for which $a_{n+1} = 3a_n + 1$ and $a_{n+3} = 3a_n$ for $n \in \mathbb{N}$.

Assignment 5, Due Friday, Oct. 7

Assignment 5, due Friday, October 5, 10am Please staple this problem sheet to your homework. When asked to prove something, make a careful step-by-step argument. You can quote anything we covered in class in support of your reasoning. Problem 1 Let $(X; d)$ and $(Y; \rho)$ be metric spaces with completions $(C; d)$ and $(D; \rho)$, assuming $X \subset C$ and $Y \subset D$.
