It was too informative with its play by play of the research findings and observations around the topics of a baby's need to suck, reasons to smile, and (this is where I decided to stop trying to read) touch and toddle throughout history. I should say that, in the intro, Day warns that this is not a parenting book, a prescriptive how-to book.

So it could be that a very smiley baby simply has more people to smile at, or spends more time engaged with a caregiver. Even then, however, her smiles could be more calculated than you'd expect.

A dynamic new story about how babies make their way in the world—and how grown-ups have tried to make sense of these tiny inscrutable beings. As a new parent, Nicholas Day had some basic but confounding questions: Why does my son find the straitjacket of his swaddling blanket comforting and not terrifying? How can he never meet a developmental norm and still be OK? And when will he stop sucking my finger? So he went digging for answers. They were not what he expected. Drawing on a wealth of perspectives—scientific, historical, cross-cultural, personal—Baby Meets World is organized around the mundane activities that dominate the life of an infant: sucking, smiling, touching, toddling. From these everyday activities, Day weaves together an account that is anything but ordinary: a fresh, surprising story, both weird and wondrous, about our first experience of the world. Part hidden history of parenthood, part secret lives of babies, Baby Meets World steps back from the moment-to-moment chaos of babydom. It allows readers to see infancy anew in all its strangeness and splendor.

Drawing on scientific, historical, cross-cultural, and personal perspectives, offers insight into how infants view and experience the world, in a work structured around four fundamental infant activities.

New mothers face a barrage of confounding decisions during the life-cycle of early motherhood which includes... Should they change their diet or mindset to conceive? Exercise while pregnant? Should they opt for a home birth or head for a hospital? Whatever they “ choose, ” they will be sure to find plenty of medical expertise from health practitioners to social media “ influencers ” telling them that they ’ re making a series of mistakes. As intersectional feminists with two small children each, Bethany L. Johnson and Margaret M. Quinlan draw from their own experiences as well as stories from a range of caretakers throughout. You ’ re Doing it Wrong! investigates the storied history of mothering advice in the media, from the newspapers, magazines, doctors ’ records and personal papers of the nineteenth-century to today ’ s websites, Facebook groups, and Instagram feeds. Johnson and Quinlan find surprising parallels between today ’ s mothering experts and their Victorian counterparts, but they also explore how social media has placed unprecedented pressures on new mothers, even while it may function as social support for some. They further examine the contentious construction of prenatal and baby care expertise itself, as individuals such as everyone from medical professionals to experienced moms have competed to have their expertise acknowledged in the public sphere. Exploring potential health crises from infertility treatments to “ better babies ” milestones, You ’ re Doing it Wrong! provides a provocative look at historical and contemporary medical expertise during conception, pregnancy, childbirth, postpartum, and infant care stages.

"A completely revised and updated second edition of one of the most popular and bestselling parenting books of all time, by America's favorite pediatrician, Dr. Harvey Karp. Harvey Karp, M.D. shares his groundbreaking approach to calming your new baby's crying and transforming your infant into the happiest baby on the block! His highly successful method is based on four revolutionary concepts: 1. Create the Fourth Trimester: How to re-create the womblike atmosphere your newborn baby still yearns for. 2. Find the Calming Reflex: An "off switch" all babies are born with, which quickly soothes fussing and crying. 3. Use the 5 S's: Five easy methods to turn on your baby's amazing calming reflex. 4. Apply the Cuddle Cure: How to combine the 5 S's to calm even colicky babies."--

Poor design and wasted funding characterize today's American playgrounds. A range of factors--including a litigious culture, overzealous safety guidelines, and an ethos of risk aversion--have created uniform and unimaginative playgrounds. These spaces fail to nurture the development of children or promote playgrounds as an active component in enlivening community space. Solomon's book demonstrates how to alter the status quo by allying data with design. Recent information from the behavioral sciences indicates that kids need to take risks; experience failure but also have a chance to succeed and master difficult tasks; learn to plan and solve problems; exercise self-control; and develop friendships. Solomon illustrates how architects and landscape architects (most of whom work in Europe and Japan) have already addressed these needs with strong, successful playground designs. These innovative spaces, many of which are more multifunctional and cost effective than traditional playgrounds, are both sustainable and welcoming. Having become vibrant hubs within their neighborhoods, these play sites are models for anyone designing or commissioning an urban area for children and their families. *The Science of Play*, a clarion call to use playground design to deepen the American commitment to public space, will interest architects, landscape architects, urban policy makers, city managers, local politicians, and parents.

From breastfeeding to vaccines to sleep, Alice ' s advice will help you make smart choices so that you can relax and enjoy your baby.

Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time.

This book presents eight of the author's short stories. In "Bog Girl: A Romance," a story about first love, a young man falls in love with a two thousand year old girl that he's extracted from a mass of peat in a Northern European bog. In "The Prospectors," two opportunistic young women fleeing the Depression strike out for new territory, and find themselves fighting for their lives. In the title story, a new mother desperate to ensure her infant's safety strikes a diabolical deal, agreeing to breastfeed the devil in exchange for his protection. The landscape in which these stories unfold is a feral, slippery, purgatorial space, bracketed by the void - yet within it, the author captures the tenderness of ordinary life.--adapted from book jacket.

"A short, deeply personal, and ultimately uplifting practical narrative on depression from a young mental health activist who has already inspired millions. Teenagers, educators, and parents alike, through the lens of his stories and battles, will be given a gritty message of hope,

light, and inspiration"--

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.
