This book provides a comprehensive analysis of the Organisation for Economic Cooperation and Development's (OECD) war on offshore tax evasion. The authors explain the new emerging regulatory regimes on the global exchange of information to combat offshore tax evasion and analyse why Automatic Exchange of Information (AEOI) is not a "magic bullet" solution. Chapters include coverage of the Foreign Account Tax Compliance Act (FATCA), AEOI and the Common Reporting Standards (CRS), and the unprecedented extra-territorial enforcement by the United States of its tax and reporting laws, including the FBAR provisions of the Bank Secrecy Act. These new legal regimes directly impact nearly all financial institutions and financial service providers in the U.S., U.K., EU, Canada, and each of the 132 member jurisdictions of the OECD's Global Forum, as well as 8 million U.S. expats. In light of The Panama Papers, this book offers a timely and valuable contribution on the prevalence and costs of international tax evasion for the global financial community, policy-makers, and practitioners alike.

Access to financial services in the small states of the Pacific is being eroded. Weaknesses in Anti-Money Laundering and Combating the Financing of Terrorism compliance in the context of high levels of remittances are contributing to banks' decisions to withdraw corresponding banking relationships and close bank accounts of money transfer operators. In this paper, we gather evidence on these developments in the small states of the Pacific, discuss the main drivers, and the potentially negative impact on the financial sector and macroeconomy. We then identify the collective efforts needed to address the consequences of withdrawal of corresponding banking relationships and outline policy measures to help the affected countries mitigate the impact.

An insight into bank secrecy in major jurisdictions, complemented by chapters on privacy, data protection, conflict of laws and exchange of information.

The pace of recovery has disappointed in recent years, and downside risks have increased, including from heightened geopolitical tensions. These increased risks make it a priority to raise actual and potential growth. In a number of economies, an increase in public infrastructure investment can also provide support to demand and help boost potential output. And in advanced economies as well as emerging and developing economies there is a general, urgent need for structural reforms to strengthen growth potential or make growth more sustainable. The four individual chapters examine the overall global outlook, the prospects for individual countries and regions, the benefits of increased public infrastructure investment in terms of raising output, and the extent to which global imbalances have narrowed significantly since their peak in 2006.

This section reflects on the practical elements that should be in place so that financial institutions can comply with AML/CTF requirements; these are categorized into the development and implementation of internal controls, policies and procedures. Part V, "International Cooperation," reviews the compilation of international laws and treaties between countries working together to combat money laundering and terrorist financing. As these unlawful activities can occur in any given country, it is important to identify the international participants who are cooperating to develop methods to obstruct these criminal activities.
