Britains Industrial Revolution The
Making

Why the 'industrial Revolution' happened in England is an immensely complicated subject, touching on politics, religion, geology, agriculture, education and many other factors. It did not have a definite start, or end, and it was not a single invention, nor even the dozen or so seminal inventions that made it happen, for many of their principles were not really new and had been proposed in earlier centuries.

Early 18th century British industries were generally small scale and relatively unsophisticated. Most textile production, for example, was centred on small workshops or in the homes of spinners, weavers and dyers: a literal 'cottage industry' that involved thousands of individual manufacturers. Such small-scale production was also a feature of most other industries, with different regions specialising in different products: metal production in the Midlands, for example, and coal mining ...
