Each disorder has several cases associated with it to capture the truly unique nature of working with various client intersections, and half of the cases provide the correct "answers" or diagnosis to allow students to check their understanding of this process. Some cases focus on a diagnosis, others with analysis, and others let the student practice on their own as a way to further student reflection and learning. This casebook is specifically written for disciplines that are grounded in a humanistic approach (Counseling, Social Work, Counseling Psychology).
