The Public Health Foundation (PHF) in partnership with the Centers for Disease Control and Prevention (CDC) is pleased to announce the availability of Epidemiology and Prevention of Vaccine-Preventable Diseases, 13th Edition or " The Pink Book " E-Book. This resource provides the most current, comprehensive, and credible information on vaccine-preventable diseases, and contains updated content on immunization and vaccine information for public health practitioners, healthcare providers, health educators, pharmacists, nurses, and others involved in administering vaccines. " The Pink Book E-Book " allows you, your staff, and others to have quick access to features such as keyword search and chapter links. Online schedules and sources can also be accessed directly through e-readers with internet access. Current, credible, and comprehensive, " The Pink Book E-Book " contains information on each vaccine-preventable disease and delivers immunization providers with the latest information on: Principles of vaccination General recommendations on immunization Vaccine safety Child/adult immunization schedules International vaccines/Foreign language terms Vaccination data and statistics The E-Book format contains all of the information and updates that are in the print version, including: · New vaccine administration chapter · New recommendations regarding selection of storage units and temperature monitoring tools · New recommendations for vaccine transport · Updated information on available influenza vaccine products · Use of Tdap in pregnancy · Use of Tdap in persons 65 years of age or older · Use of PCV13 and PPSV23 in adults with immunocompromising conditions · New licensure information for varicella-zoster immune globulin Contact bookstore@phf.org for more information. For more news and specials on immunization and vaccines visit the Pink Book's Facebook fan page

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

This book is dedicated to improving healthcare through reducing delays experienced by patients. With an interdisciplinary approach, this new edition, divided into five sections, begins by examining healthcare as an integrated system. Chapter 1 provides a hierarchical model of healthcare, rising from departments, to centers, regions and the " macro system. " A new chapter demonstrates how to use simulation to assess the interaction of system components to achieve performance goals, and Chapter 3 provides hands-on methods for developing process models to identify and remove bottlenecks, and for developing facility plans. Section 2 addresses crowding and the consequences of delay. Two new chapters (4 and 5) focus on delays in emergency departments, and Chapter 6 then examines medical outcomes that result from waits for surgeries. Section 3 concentrates on management of demand. Chapter 7 presents breakthrough strategies that use real-time monitoring systems for continuous improvement. Chapter 8 looks at the patient appointment system, particularly through the approach of advanced access. Chapter 9 concentrates on managing waiting lists for surgeries, and Chapter 10 examines triage outside of emergency departments, with a focus on allied health programs Section 4 offers analytical tools and models to support analysis of patient flows. Chapter 11 offers techniques for scheduling staff to match patterns in patient demand. Chapter 12 surveys the literature on simulation modeling, which is widely used for both healthcare design and process improvement. Chapter 13 is new and demonstrates the use of process mapping to represent a complex regional trauma system. Chapter 14 provides methods for forecasting demand for healthcare on a region-wide basis. Chapter 15 presents queueing theory as a method for modeling waits in healthcare, and Chapter 16 focuses on rapid delivery of medication in the event of a catastrophic event. Section 5 focuses on achieving change. Chapter 17 provides a diagnostic for assessing the state of a hospital and using the state assessment to select improvement strategies. Chapter 18 demonstrates the importance of optimizing care as patients transition from one care setting to the next. Chapter 19 is new and shows how to implement programs that improve patient satisfaction while also improving flow. Chapter 20 illustrates how to evaluate the overall portfolio of patient diagnostic groups to guide system changes, and Chapter 21 provides project management tools to guide the execution of patient flow projects.

Implement standards-based grading practices that help students succeed! Classroom assessment methods should help students develop to their full potential, but meshing traditional grading practices with students ' achievement on standards has been difficult. Making lasting changes to grading practices requires both knowledge and willpower. Discover eight guidelines for good grading, recommendations for practical applications, and suggestions for implementing new grading practices as well as: ? The why ' s and the how-to ' s of implementing standards-based grading practices ? Tips from 48 nationally and internationally known authors and consultants ? Additional information on utilizing level scores rather than percentages ? Reflective exercises ? Techniques for managing grading more efficiently

Adolescent homelessness is a growing problem that results in a variety of health challenges. This text is a practical resource designed to promote effective interdisciplinary health and social care interventions targeting adolescents who are homeless or at risk for homelessness. It is based on extensive interdisciplinary experience, reviews of pertinent research and insights and contributions of leading professionals who are directly involved in the care of these young people. Divided into four main sections, Section 1: (Chapters 1-7) section one is a review of the structure and professional involvement of program models targeting youth experiencing or at risk for homelessness to encourage broader understanding and utilization of principles and practices underlying effective programs and identify replicable components. Section 2: (Chapters 8-16) Section two is clinically focused with recommendations for working with adolescents and youth experiencing homelessness and interventions for common and significant medical and mental health conditions, and substance use disorders. Section 3: (Chapter 17) Reviews international agreements regarding stabilization and care of refugee youth and families, description of experiences of refugee children and youth in developed countries, and an outline of conditions from which refugee youth and families have left. Section 4: (Chapters 18 and 19) Engagement of homeless youth in research and future research directions to address needs of youth experiencing homelessness. Written by experts from a variety of disciplines, Clinical Care for Homeless, Runaway and Refugee Youth is a first of its kind text for physicians, social workers, public health workers and any other individual that works directly with these vulnerable populations.
