Energy Theorem IIT JEE NEET || Chapter Review For Work Power

Power:-The rate at which work is done is called power and is defined as, P = W/t = F.s/v = F.v. Here s is the distance and v is the speed. Instantaneous power in terms of mechanical energy:- P = dE/dt. Units: The unit of power in S.I system is J/s (watt) and in C.G.S system is erg/s. Energy:-1) Energy is the ability of the body to do some work. The unit of energy is same as that of work.
