In sheer numbers, no form of government control comes close to the police stop. Each year, twelve percent of drivers in the United States are stopped by the police, and the figure is almost double among racial minorities. Police stops are among the most recognizable and frequently criticized incidences of racial profiling, but, while numerous studies have shown that minorities are pulled over at higher rates, none have examined how police stops have come to be both encouraged and institutionalized. *Pulled Over* deftly traces the strange history of the investigatory police stop, from its discredited beginning as "aggressive patrolling" to its current status as accepted institutional practice. Drawing on the richest study of police stops to date, the authors show that who is stopped and how they are treated convey powerful messages about citizenship and racial disparity in the United States. For African Americans, for instance, the experience of investigatory stops erodes the perceived legitimacy of police stops and of the police generally, leading to decreased trust in the police and less willingness to solicit police assistance or to self-censor in terms of clothing or where they drive. This holds true even when police are courteous and respectful throughout the encounters and follow seemingly colorblind institutional protocols. With a growing push in recent years to use local police in immigration efforts, Hispanics stand poised to share African Americans' long experience of investigative stops. In a country that celebrates democracy and racial equality, investigatory stops have a profound and deleterious effect on African American and other minority communities that merits serious reconsideration. *Pulled Over* offers practical recommendations on how reforms can protect the rights of citizens and still effectively combat crime.

As policing has recently become a major topic of public debate, it was also a growing area of ethnographic research. *Writing the World of Policing* brings together an international roster of scholars who have conducted fieldwork studies of law enforcement in disadvantaged urban neighborhoods on five continents. How, they ask, can ethnography illuminate the role of the police in society? Are there important aspects of policing that are not captured through interviews and statistics? And how can the study of law enforcement shed light on the practice of ethnography? What might studying policing teach us about the epistemological and ethical challenges of participant observation? Beyond these questions of crucial interest for criminology and, more generally, the social sciences, *Writing the World of Policing* provides a timely discussion of one of the most problematic institutions in contemporary society.

Forensic linguistics, or the study of language and the law, is a growing field of scholarly and public interest with an established research presence. *The Discourse of Police Interviews* aims to further the discussion by analyzing how police interviews are constructed and used to investigate and prosecute crimes. The first book to focus exclusively on the discourses of police interviewing, *The Discourse of Police Interviews* examines leading debates, approaches, and topics in contemporary police interview research. Among other topics, the book explores the sociolegal, psychological, and discursive framework of popular police interview techniques employed in the United States and the United Kingdom, such as PEACE and Reid, and the discursive practices of institutional representatives like police officers and interpreters that can influence the construction and quality of linguistic evidence. Together, the contributions situate the police interview as part of a complex, and multistage, criminal justice process. The book will be of interest to both scholars and practitioners in a variety of fields, such as linguistic anthropology, interpreting studies, criminology, law, and sociology.

This ethnography of everyday policing practices in Lucknow, a major Indian metropolis, demonstrates how police authority and its assumed afflictions are refracted through a multi-dimensional field of social relationships in which power positions and moral boundaries are continually contested and shifting. This field generates among police what legal anthropologist Beatrice Jauregui calls provisional authority, a fractured and contingent form of capability and subjectivity that is not always immediately visible or comprehensible. Provisional authority may provide a social good, but with questionable and transmutable efficacy or legitimacy. Drawing on scholarship from anthropology, legal history, sociology, and political theory, Jauregui considers prevalent problems like routinized corruption, bureaucratized cronyism, evidence fabrication and extralegal violence among police as expressions of strategic adaptation and often a sincere if failing attempt to perform what officers themselves consider real police work in the face of interference, incapacity, disaffection and fragmented knowledge. This analysis of the fraught nature of police authority in India pushes contemporary theories of state power, legality and legitimacy, and postcolonialism and decolonization in different and provocative directions, opening new vistas for understanding policing as a global historical practice hybridizing local, statist, and transnational modes of producing and performing authority and order. *Provisional Authority* offers an innovative and challenging read of classical and contemporary theories of the postcolonial state, and an incisive perspective on public order in relation to police authority as co-configured by practice and subjectivity."

Why, even in the same high-crime neighborhoods, do robbery, drug dealing, and assault occur much more frequently on some blocks than on others? One popular theory is that a weak sense of community among neighbors can create conditions more hospitable for criminals, and another proposes that neighborhood disorder—such as broken windows and boarded-up buildings—makes crime more likely. But in his innovative new study, Peter K. B. St. Jean argues that we cannot fully understand the impact of these factors without considering that, because urban space is unevenly developed, different kinds of crimes occur most often in locations that offer their perpetrators specific advantages. Drawing on Chicago Police Department statistics and extensive interviews with both law-abiding citizens and criminals in one of the city's highest-crime areas, St. Jean demonstrates that drug dealers and robbers, for example, are primarily attracted to locations with businesses like liquor stores, fast food restaurants, and check-cashing outlets. By accounting for these important factors of spatial positioning, he expands upon previous research to provide the most comprehensive explanation available of why crime occurs where it does.

Probing the relationship between German political economy and everyday fiscal administration, *The Disordered Police State* focuses on the cameral sciences—a peculiarly German body of knowledge designed to train state officials—and in so doing offers a new vision of science and practice during the seventeenth and eighteenth-centuries. Andre Wakefield shows that the cameral sciences were at once natural, technological, and economic disciplines, but, more important, they also were strategic sciences, designed to procure patronage for their authors and good publicity for the German principalities in which they lived and worked. Cameralism, then, was the public face of the prince's most secret affairs; as such, it was an essentially dishonest enterprise. In an entertaining series of case studies on mining, textiles, forestry, and universities, Wakefield portrays cameralists in their own gritty terms. The result is a revolutionary new understanding about how the sciences created and maintained an image of the well-ordered police state in early modern Germany. In raising doubts about the status of these German sciences of the state, Wakefield ultimately questions many of our accepted narratives about science, culture, and society in early modern Europe.
