From the time of its first publication, 'Tearoom Trade' engendered controversy. It was also accorded an unusual amount of praise for a first book on a marginal, intentionally self-effacing population by a previously unknown sociologist. The book was quickly recognized as an important, imaginative, and useful contribution to our understanding of "deviant" sexual activity. Describing impersonal,

anonymous sexual encounters in public restrooms—"tearooms" in the argot—the book explored the behavior of men whose closet homosexuality was kept from their families and neighbors. By posing as an initiate, the author was able to engage in systematic observation of homosexual acts in public settings, and later to develop a more complete picture of those involved by interviewing them in their homes, again without revealing their unwitting participation in his study. This enlarged edition of 'Tearoom Trade' includes the original text, together with a retrospect, written by Nicholas von Hoffman, Irving Louis Horowitz, Lee Rainwater, Donald P. Warwick, and Myron Glazer. The material

added includes a perspective on the social scientist at work and the ethical problems to which that work may give rise, along with debate by the book's initial critics and proponents. Humphreys added a postscript and his views on the opinion expressed in the retrospect.

Serial entrepreneurs David Kidder and Christina Wallace reveal their revolutionary playbook for igniting growth inside established companies. Most established companies face a key survival challenge, says David Kidder, CEO of Bionic, lifelong entrepreneur, and angel investor in more than thirty startups: operational efficiency and outdated bureaucracy are at war with new

growth. Legacy companies are skilled at growing big businesses into even bigger ones. But they are less adept at discovering new opportunities and turning them into big businesses, the way entrepreneurs and early-stage investors must. In *New to Big*, Kidder and Wallace reveal their proprietary blueprint for installing a permanent growth capability inside any company--the Growth Operating System. The Growth OS borrows the best tools, systems, and mind-sets from entrepreneurship and venture capital and adapts them for established organizations, leveraging these two distinct skills as a form of management for building in a future that is uncertain. By focusing on what

consumers do rather than what they say, celebrating productive failure, embracing a portfolio approach, and learning from the outside-in, Kidder and Wallace argue any company can go on offense and win the future. This isn't about a one-off innovation moonshot. It's about building a permanent ladder to the moon.
