difficulties women encounter when trying to satisfy working and mothering lives which are governed by quite different values. Drawing on focus groups and interviews with thirty women who combine motherhood with paid work in Ireland, this book reveals the difficulties, complexities and dilemmas women experience and reveals that there is a complex system of inequality which occurs when women combine motherhood with paid work. These inequalities occur at individual, discursive, social and structural levels and their combination makes it difficult for women to satisfy working and mothering lives. Contemporary society uses maternity to divide and conquer women, both in public and private spheres, and women's inequalities are maintained because the issue is privatised, women are silenced and ignored. This book looks at the gender system which creates this complex inequality and reveals that by privileging some women sometimes, enduring inequalities are created for all women.

First published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

An updated edition of a standard in its field that remains relevant more than thirty years after its original publication. Over thirty years ago, sociologist and University of California, Berkeley professor Arlie Hochschild set off a tidal wave of conversation and controversy with her bestselling book, *The Second Shift*. Hochschild's examination of life in dual-career households finds that, factoring in paid work, child care, and housework, working mothers put in one month of labor more than their spouses do every year. Updated for a workforce that is now half female, this edition cites a range of updated studies and statistics, with an afterword from Hochschild that addresses how far working mothers have come since the book's first publication, and how much farther we all still must go.

This interdisciplinary and international volume offers an innovative and critical exploration of the impact of motherhood on the engagement of women in media and creative industries across the globe. Diverse contributions critically engage with the intersections and overlap between the social categories of worker and mother, and the work of media production and maternal caregiving. Conflicting ideas about, and expectations of, mothers are untangled in the context of the working world of radio, film, television and creative media industries. The book teases out commonalities between experiences that are evident across a number of countries, from Hollywood to Bollywood, as well as examining the differences between class, religion, maternal status and cultural frameworks that surround working mothers in various nation states. It also offers some possibilities for ways forward that can improve the lives of women workers who are also mothers. A timely and valuable contribution to international debates on equality, mothers and motherhood in audiovisual industries, this book will be of interest to scholars and students of media, communication, cultural studies and gender, programmes engaged with work

Difficult Women on Television Drama analyses select case studies from international TV dramas to examine the unresolved feminist issues they raise or address: equal labor force participation, the demand for sexual pleasure and freedom, opposition to sexual and domestic violence, and the need for intersectional approaches. Drawing on examples from *The Killing*, *Orange is the New Black*, *Big Little Lies*, *Wentworth*, *Outlander*, *Westworld*, *Being Mary Jane*, *Queen Sugar*, *Vida*, and other television dramas with a focus on complex female characters, this book illustrates how female creative control in key production roles (direct authorship) together with industrial imperatives and a conducive cultural context (indirect authorship) are necessary to produce feminist texts. Placed within the larger context of a rise in feminist activism and political participation by women; the growing embrace of a feminist identity; and the ascendance of post-feminism, this book reconsiders the unfinished nature of feminist struggle(s) and suggests the need for a broader sweep of economic change. This book is a must-read for scholars of media and communication studies; television and film studies; cultural studies; American studies; sociology of gender and sexualities; women and gender studies; and international film, media and cinema studies.

'*Space Gender Knowledge*' is an innovative and comprehensive introduction to the geographies of gender and the gendered nature of spatial relations. It examines the major issues raised by women's movements and academic feminism, and outlines the main shifts in feminist geographical work, from the geography of women to the impact of post-structuralism. In making their selection, the editors have drawn on a wide range of interdisciplinary material, ranging across spatial scales from the body to the globe. The book presents influential arguments for the importance of the intersection between space and gender. Looking both at geography and beyond the discipline, it explores the gendered construction of space and the spatial construction of gender. Divided into a number of conceptual sections, each prefaced by an editorial introduction, this reader includes extracts from both landmark texts and less well-known works, making it an indispensable introduction to this dynamic field of study.

Based on extensive research, this text provides a critical investigation of the development of the Women's Co-operative Guild from the 1880s to World War II. Charting the rise and fall of an exceptional feminist political organization, the author assesses the political significance of the movement during the decades of its greatest influence and examines the causes and circumstances of its demise. Advancing a fresh perspective on working-class women's organizations, this book combines historical narrative, biography and political analysis.
