'Computer Age Statistical Inference offers a refreshing view of modern statistics. Algorithmics are put on equal footing with intuition, properties, and the abstract arguments behind them. The methods covered are indispensable to practicing statistical analysts in today's big data and big computing landscape.'

the future direction of statistics and data
science. Clarifies both traditional methods
and current, popular algorithms (e.g. neural
nets, random forests) Written by two world-
leading researchers

Computer Age Statistical Inference (??)

In short, Computer Age Statistical Inference
does a masterful job of linking the
traditional inference techniques of Fisher
and Neyman to modern machine learning all the
while showing their similarities and
differences.
