Conceptual Physics Chapter 34 Electric Current Test

Right here, we have countless ebook **conceptual physics chapter 34 electric current test** and collections to check out. We additionally present variant types and as a consequence type of the books to browse. The gratifying book, fiction, history, novel, scientific research, as without difficulty as various new sorts of books are readily handy here.

Chapter 34 - Electric Current Page 6 of 7
Speed of electrons in a circuit D.C. Electrons move slowly (10^{-4}ms^{-1}) compared with the electric signal. ($3 \times 10^8\text{ms}^{-1}$). Electrons take about 3 hours to travel through a metre of wire.

Electric Current

Voltage is an "electric pressure" that can produce a flow of charge, or current, within a conductor.

34.1 Flow of Charge

When the ends of an electric conductor are at different electric potentials, charge flows

from one end to the other.

Summary - Mr. Richendollar's Science

CHAPTER 34 ELECTRIC CURRENT681 34.1 Flow of Charge Recall that heat flows through a conductor when a difference in temperature exists between its ends. Heat flows from the end of higher temperature to the end of lower temperature.

Electric Power Recall that the rate energy is converted from one form to another is power.
 $\text{power} = \frac{\text{energy converted}}{\text{time}} = \text{voltage} \times \text{current}$
The unit of power is the watt (or kilowatt). So in units form, Electric power (watts) = current (amperes) \times voltage
