Give 5 initial rescue breaths. Place 2 fingers in the middle of the chest and push down by 4cm (about 1.5 inches), which is approximately one-third of the chest diameter. The quality (depth) of chest compressions is very important. Use the heel of 1 hand if you can't achieve a depth of 4cm using the tips of 2 fingers.

The American Heart Association®/American Stroke Association® (AHA/ASA) collects millions of patient records in our Quality Programs, creating vast national level databases for advancing scientific research. Data is collected at the patient level in hospitals participating in AHA/ASA Quality programs. Patients entered in the database are from U.S. hospitals only.
