**Crime Laboratory System: Forensic Science History**

Crime laboratory, also called forensic laboratory, facility where analyses are performed on evidence generated by crimes or, sometimes, civil infractions. Crime laboratories can investigate physical, chemical, biological, or digital evidence and often employ specialists in a variety of disciplines, including behavioral forensic science, forensic pathology, forensic anthropology, crime-scene investigation, and ballistics.

**Crime laboratory | Britannica**

Forensic science is a critical element of the criminal justice system. Forensic scientists examine and analyze evidence from crime scenes and elsewhere to develop objective findings that can assist in the investigation and prosecution of perpetrators of crime or absolve an innocent person from suspicion.

**Forensic Science - justice.gov**

An introduction of Forensic Science defines it as, “the application of science to those criminal and civil laws that are enforced by police agencies in a criminal justice system”. Forensic Science deals with the application of the knowledge and methodology of various disciplines of science to legal matters.

**Role of Forensic Science in the Criminal Justice System...**

1996: The Forensic Investigation Center, below, headquarters for the Crime Laboratory System, opened Oct. 22 as Building #30 on the State Office Campus in Albany. The entire \$25 million state-of-the-art facility was paid for with money from assets seized from drug traffickers, making it “the house that crack built.”

**Crime Laboratory System: Laboratory History**

Forensic science is a discipline that applies scientific analysis to the justice system, often to help prove the events of a crime. Forensic scientists analyze and interpret evidence found at the crime scene. That evidence can include blood, saliva, fibers, tire tracks, drugs, alcohol, paint chips and firearm residue.

**How Forensic Lab Techniques Work | HowStuffWorks**

The Forensic Science Laboratories Facilities Technical Working Group (TWG) was formed to support the preparation of this handbook. This group includes 16 professional forensic science planning experts with various backgrounds (laboratory directors, forensic science planners, architects, and engineers) from Federal, state, and

**Forensic Science Laboratories - NIST**

Thus, the role of forensic science in criminal justice and the legal system is highly critical but is often underrated. The scope of Forensic Science . Forensic Biology/DNA: Apart from fingerprint analysis, DNA profiling is the other commonly used forensic technique in criminal investigations. DNA being as unique to an individual as fingerprints, help forensic professionals identify or confirm an unidentified person, or to eliminate suspects from a list of accused.
