Remember that a crisis management team is designed to deal with unexpected events or sequences of events, occurrences, or emergencies that may have specific or wide ranging consequences. In some cases, there is nothing a crisis management team can do to prevent a crisis, such as a natural disaster. However, because no two crisis management plans are alike, team members should be aware of the most common weaknesses found in many plans.

Great strides have been made in the past four decades in the development of geospatial data and tools that describe locations of objects on the Earth's surface and make it possible for anyone with access to the Internet to witness the magnitude of a disaster. However, the effectiveness of any technology is as much about the human systems in which it is embedded as about the technology itself. Successful Response Starts with a Map assesses the status of the use of geospatial data, tools, and infrastructure in disaster management, and recommends ways to increase and improve their use. This book explores emergency planning and response; how geospatial data and tools are currently being used in this field; the current policies that govern their use; various issues related to

prepare and react to potential unexpected incidents that can occur to their organization. The book begins with an overview of the primary principles of business emergency planning, then delves into the considerations that an organization should take when developing their emergency plan. This includes the mitigation strategies for preventing the incident from occurring in the first place. It then shows how to identify and assess the risks the organization may realistically face, choose the commensurate security measures, and create the proper emergency response policies and procedures. The book explores how to respond in the event of an actual emergency, and how to recover business operations to full functionality after an incident occurs.

The world is becoming more hazardous as natural and social processes combine to create complex situations of increased vulnerability and risk. There is increasing recognition that this trend is creating exigencies that must be dealt with. The common approach is to delegate the task of preparing an emergency plan to someone. Often that person is expected to get on with job but rarely is the means and instruction of how to write such a plan provided to them. There are a host of instances in which the letter of the law, not the spirit, is honoured by providing a token plan of little validity.
