approach to social philosophy which focuses on providing a reflective assessment and critique of society and culture in order to reveal and challenge power structures. With origins in sociology, as well as in literary criticism, it argues that social problems are influenced and created more by societal structures and cultural assumptions than by individual and psychological factors. Maintaining that ideology is the principal obstacle to human liberation, critical theory was

This theory is developed through a critique and comparison of the powerful ideas on culture offered by Pierre Bourdieu and the Frankfurt School thinkers, especially Theodor Adorno. Bourdieu and the Frankfurt
School postulate opposite
theories of the cultural
legitimation of class
inequalities. Bourdieu
argues that the culture of
modern society is a class
culture, a ranked diversity
of beliefs and tastes
corresponding to different
classes. The cultural
beliefs and practices of the
dominant class are
arbitrarily defined as
superior, thus legitimating
its greater share of social

culture as a mass culture, a leveled homogeneity in which the ideas and tastes shared by all classes disguises real class inequalities. This creates the illusion of an egalitarian democracy that prevents inequalities from being contested. Through an empirical assessment of the theories against the cases, Gartman reveals that both are correct, but for different parts of modern culture. These parts combine to provide a strong legitimation of class inequalities.

Benjamin, Capitalizing on The Culture presents an innovative, accessible, and timely exploration of critical theory in a cultural landscape dominated by capital. Despite the increasing prevalence of commodification as a dominant factor in the production, promotion, and consumption of most forms of mass culture, many in the cultural studies field have failed to engage systematically either with culture as commodity or with critical theory. Shane Gunster corrects that oversight, providing attentive readings of Adorno and Benjamin's work in order

to generate a complex, non-reductive theory of human experience that attends to the opportunities and dangers arising from the confluence of culture and economics. Gunster juxtaposes Benjamin's thoughts on memory, experience, and capitalism with Adorno's critique of mass culture and modern aesthetics to illuminate the key position that the commodity form plays in each thinker's work and to invigorate the dialectical complexity their writings acquire when considered together. This blending of perspectives is subsequently used to ground a theoretical

interrogation of the comparative failure of cultural studies to engage substantively with the effect of commodification upon cultural practices. As a result, Capitalizing on Culture offers a fresh examination of critical theory that will be valuable to scholars studying the intersection of culture and capitalism.

What emerges most forcefully from the book is the error of dismissing postmodernism as a self-indulgent and ultimately, dangerous piece of ideology.
