ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

The New Testament church was founded upon the teachings of the Lord Jesus Christ and His apostles. The New Testament was finally completed and the last apostle died just before the end of the first century. It is in their writings that God has delivered to the human race the surest, most reliable and accurate words regarding salvation. Yet, somehow through time, the original demands of Jesus and His apostles have been degraded and dismissed as meaningless mandates, senseless stipulations and irrelevant rhetoric. This

book is a full-frontal assault on the partial truths, blatant lies and trite traditions that have not only besieged modern Christianity but have actually infiltrated it. This book is a decree to discard the "cunningly devised fables of men". And it is a commission to reencounter the soul-purifying truths of the faith that was delivered first. (Revised 2008).

This new edition of the popular Pharmacology case studies for nurse prescribers has been thoroughly revised in the light of the latest research and guidance from NICE, the British National Formulary (BNF), the Royal Pharmaceutical Society, the Nursing and Midwifery Council and the Royal College of Nursing. While the first edition was aimed at students undertaking the non-medical prescribing modules, this updated text has broadened its scope and is

relevant to all trainee and qualified nurse prescribers. There are new and additional chapters on pregnancy and breastfeeding, sexual health and contraception, and prescribing for frailty syndrome in the elderly. The latest developments in pharmacology (such as the emergence of biosimilar drugs) are included in the text; and all the chapters from the first edition have been revised and updated by expert healthcare practitioners. Meanwhile, the practical approach and helpful features that made the first edition so popular remain unchanged. The authors offer a basic introduction to pharmacological concepts, embedded in specific conditions, through case studies and self-assessment questions. By utilising a case study approach, they enable the reader to link pharmacological concepts with clinical practice. Reading this book, and carrying out the numerous self-assessment

activities, will give the reader an appreciation of the value of having a sound pharmacological knowledge base in order to deliver safe practice, effective prescribing and improved patient care.

Praise for the first edition: "A useful and practical accompaniment for those studying nurse prescribing, this textbook is also a valuable resource for practitioners qualified in this extended role and those who prescribe and administer medications daily." Valerie McGurk, Practice

Development Nurse, Nursing Management

"This book is a comprehensive collection of case studies on a number of conditions, from heart failure to eye problems." Lynda Gibbons, Registered Advanced Nurse Practitioner, Emergency Nurse

Deborah Norville's groundbreaking and persuasive book argues that gratitude is the secret key to unlocking one's full life

potential. Thank You. Can such small words hold life-changing power? Yes! Rooted in science, presented from a spiritual perspective, Thank You Power details the surprising life improvements that can stem from the practice of gratitude. In this eye-opening book, Deborah Norville brings together for the first time the behavioral and psychological research that prove what people of faith have long known: giving thanks brings life blessings. Beginning with two small words, thank you, Norville shows how anyone can be happier and more resilient, have better relationships, improved health, and less stress. After two years of scientific research, Norville brings it all together with powerful personal stories of thank you power in action and gives specific steps for readers to cultivate thank you power and put it to work in their own lives.

Mashups are mostly lightweight Web applications that offer new functionalities by combining, aggregating and transforming resources and services available on the Web. Popular examples include a map in their main offer, for instance for real estate, hotel recommendations, or navigation tools. Mashups may contain and mix client-side and server-side activity. Obviously, understanding the incoming resources (services, statistical figures, text, videos, etc.) is a precondition for optimally combining them, so that there is always some undercover semantics being used. By using semantic annotations, neutral mashups permute into the branded type of

semantic mashups. Further and deeper semantic processing such as reasoning is the next step. The chapters of this book reflect the diversity of real-life semantic mashups. Two overview chapters take the reader to the environments where mashups are at home and review the regulations (standards, guidelines etc.) mashups are based on and confronted with. Chapters focusing on DBpedia, search engines and the Web of Things inspect the main Web surroundings of mashups. While mashups upgrading search queries may be nearer to the everyday experience of readers, mashups using DBpedia input and sensor data from the real world lead to important new and therefore less known developments. Finally, the diversity of mashups is tracked through a few application areas: mathematical knowledge, speech, crisis and disaster management, recommendations (for

games), inner-city information, and tourism. Participants of the AI Mashup Challenge wrote all the chapters of this book. The authors were writing for their current and future colleagues – researchers and developers all over the Web who integrate mashup functionalities into their thinking and possibly into their applications.
