[is] an able translation by Barbara Johnson Derrida's central contention is that language is haunted by dispersal, absence, loss, the risk of unmeaning, a risk which is starkly embodied in all writing. The distinction between philosophy and literature therefore becomes of secondary importance. Philosophy vainly attempts to control the irrecoverable dissemination of its own meaning, it strives—against the grain of language—to offer a sober revelation of truth. Literature—on the other hand—flaunts its own meretriciousness, abandons itself to the Dionysiac play of language. In *Dissemination*—more than any previous work—Derrida joins in the revelry, weaving a complex pattern of puns, verbal echoes and allusions, intended to 'deconstruct' both the

This is a trans-disciplinary collection dedicated to the work of Jacques Derrida and his work in the humanities.

First published in 1967, *Writing and Difference*, a collection of Jacques Derrida's essays written between 1959 and 1966, has become a landmark of contemporary French thought. In it we find Derrida at work on his systematic deconstruction of

Western metaphysics. The book's first half, which includes the celebrated essay on Descartes and Foucault, shows the development of Derrida's method of deconstruction. In these essays, Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought—one of his main targets being the way in which "structuralism" unwittingly repeats metaphysical concepts in its use of linguistic models. The second half of the book contains some of Derrida's most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language, finally showing metaphysics to be constituted by this exclusion. These essays on Artaud, Freud, Bataille, Hegel, and Lévi-Strauss have served as introductions to Derrida's

notions of writing and différence—the untranslatable formulation of a nonmetaphysical "concept" that does not exclude writing—for almost a generation of students of literature, philosophy, and psychoanalysis. Writing and Difference reveals the unacknowledged program that makes thought itself possible. In analyzing the contradictions inherent in this program, Derrida goes on to develop new ways of thinking, reading, and writing,—new ways based on the most complete and rigorous understanding of the old ways. Scholars and students from all disciplines will find Writing and Difference an excellent introduction to perhaps the most challenging of contemporary French thinkers—challenging because Derrida questions thought as we know it.

Is giving possible? Is it possible to give without immediately entering into a circle of exchange that turns the gift into a debt to be returned? This question leads Jacques Derrida to make out an irresolvable paradox at what seems the most fundamental level of the gift's meaning: for the gift to be received as a gift, it must not appear as such, since its mere appearance as gift puts it in the cycle of repayment and debt. Derrida reads the relation of time to gift through a number of texts: Heidegger's *Time and Being*, Mauss's *The Gift*, as well as essays by Benveniste and Levi-Strauss that assume Mauss's legacy. It is, however, a short tale by Baudelaire, "Counterfeit Money," that guides Derrida's analyses throughout. At stake in his reading of the tale, to

which the second half of this book is devoted, are the conditions of gift and forgiveness as essentially bound up with the movement of dissemination, a concept that Derrida has been working out for many years. For both readers of Baudelaire and students of literary theory, this work will prove indispensable.

Stocker's clear and helpful introductions set each reading in context, making the volume an ideal companion for those coming to Derrida's writings for the first time. The selections themselves range from his most infamous works including *Speech and Phenomena* and *Writing and Difference* to lesser known discussion on aesthetics, ethics and politics.

"The focus of any genuinely new piece of criticism or interpretation must be on the creative act of finding the new, but deconstruction puts the matter the other way around: its emphasis is on debunking the old. But aside from the fact that this program is inherently uninteresting, it is, in fact, not at all clear that it is possible. . . . [T]he naïveté of the crowd is

--From the book

Limited Inc. is a major work in the philosophy of language by the celebrated French thinker Jacques Derrida. The book's two essays, 'Limited Inc.' and 'Signature Event Context,' constitute key statements of the Derridean theory of deconstruction. They are perhaps the clearest exposition to be found of Derrida's most controversial idea.
