Homemade equipment can be used to train your dog at home but not used in a professional course. When fashioning your agility items, contact your local kennel club or other dog agility sponsoring organization to check on the proper measurements for equipment appropriate for your dog's size and breed. If you do not want your dog to compete professionally, you can use agility equipment to help with his exercise and obedience training and to boost his confidence.

The amazing thing about horses is there's one out there suited for just about every human. They come in all colors, shapes, and sizes, and we've trained them to excel at any number of riding sports that appeal to human personalities across the board. But until now, there hasn't been an internationally recognized, competitive horse sport dedicated to those horse lovers who most enjoy working their horse from the ground. With Horse Agility, that's all changing. Over the past few decades, an evolution in how we go about training horses has encouraged horse owners to spend more time handling their horse on the ground in order to achieve good behavior, mutual trust, and a healthy partnership—before they ever think about getting in the saddle. This has created a generation of horsemen and women perfectly poised to pursue the competitive and social benefits of the sport of Horse Agility. Think, for a moment, of the hugely popular Dog Agility classes you've no doubt seen—it is no secret they're enjoyed by countless canines and their handlers, all over the world. With great exuberance and palpable enjoyment, a dog dashes around a colorful obstacle course, following subtle direction from his handler. Usually this occurs without a leash, and without other devices designed to "persuade" him to participate. The dog completes the course because he chooses to—NOT because he is constrained, forced, whipped, prodded, or bribed. Horse trainer Vanessa Bee, founder of the International Horse Agility Club, says that we need to change the way we think about horses and the sports and activities we so often pursue with them. She sees no reason the horse cannot enjoy your time together so much, he will choose to "play" with you—over, under, and through obstacles, without a lead rope, even when loose in a large, grassy pasture. Hard to believe? Try it for yourself! The Horse Agility Handbook has all you need to get started in the sport, including lessons in handling and body language, directions for obstacle and course construction, and information for managing competitions and "play days."

Zak George is a new type of dog trainer. Training your dog (and yourself) for agility competitions will create a fun working relationship that both of you can enjoy. Find everything you need to know in this fun guide that includes information on pre-agility training, detailed advice on correction-free training and step-by step agility training techniques. Also learn how to make your own agility obstacles use a clicker as a motivational tool, and officially enter agility trials. Participation in agility competitions can build a strong, enduring bond between you and your dog. Read The Beginners Guide to Dog Agility to learn the ins and outs of this exciting hobby.

"Short, fun sessions are ideal for a dog, especially when they end with success! Each 10 minute exercise will boost your dog's intelligence as their brain is challenged with new behaviors. This special time with their owner will be the highlight of their day"—Page [4] of cover.

Do you long for a dog that will soar accurately and enthusiastically through the most challenging agility course, while working at great distances? If so, you have come to the right place. This book will show you how to train your joined-at-the-hip Velcro dog to both enjoy and excel at working away from you. The ability to handle your dog at a distance is a tremendous asset if not a necessity in all types of agility courses. Through the methods detailed in this book you can: Attain a competitive advantage through the enormous flexibility you will gain in choosing a winning handling strategy; Take a shorter path than your dog by working at a lateral distance, thus allowing you to take full advantage of your dog s fastest speed instead of being limited by yours; Acquire tools to enable you to smoothly handle courses with handler restrictions, long straight-aways, and layering challenges; Ace courses that specifically require distance skills, such as Gamblers and FAST; Enjoy the exhilarating feeling of ultimate teamwork as you and your canine partner master-fully negotiate the course together, yet independently.
