During operations on a drilling or producing well, a sequence of events may require tubing, casing, or drill pipe to be run or pulled while annular pressure is contained by blowout preventers; such practice is called "stripping". Stripping is normally considered an emergency procedure to maintain well control; however, plans for certain drilling, completion, or well work operations may include stripping to eliminate the necessity of loading the well with fluid.

## STRIPPING OPERATIONS - Drilling Manual

General Drilling Operations. THE DRILLING PROCESS. After a workpiece is laid out and properly mounted, the drilling process can begin. The drilling process, or complete operation, involves

## Drilling Operations (3D Animation) - YouTube

Drilling operation: When we need a circular hole in a workpiece of any size there, we can use drilling operation, by a drilling operation you can form any size of holes in a workpiece. Although you can use a lathe for drilling operation too, drill machine is an appropriate machine to do holes in a workpiece. The cutting tool we used for this type of operation is drill bit. A drill bit is a multipoint rotary cutting tool which helps to remove material from a workpiece.
