in early childhood education is based on the research and writings of Jean Piaget. Piaget ' s theory states that students in this age category learn the most when they are able to learn through play. Play is an important part of development in children, not merely as a busy activity but in developing skills necessary for life. Types of play particularly associated with early childhood education are: Arts and crafts; Games

Wealth of scientific knowledge that has emerged in recent decades. The study shaped policy agendas and intervention efforts at national, state, and local levels. It captured a gratifying level of attention in the United States and around the world and has helped to foster a highly dynamic and increasingly visible science of early childhood development. It contributed to a growing public understanding of the foundational importance of the early childhood years and has stimulated a global conversation about the unmet needs of millions of young children. Ten years later, the Board on Children, Youth, and Families of the Institute of Medicine (IOM) and the National Research Council (NRC) held a 2-day workshop in Washington, D.C., to review and commemorate a decade of

Research Papers advances related to the mission of the report. The workshop began with a series of highly interactive breakout sessions in which experts in early childhood development examined the four organizing themes of the original report and identified both measurable progress and remaining challenges. The second day of the workshop, speakers chosen for their diverse perspectives on early childhood research and policy issues discussed how to build on the accomplishments of the past decade and to launch the next era in early childhood science, policy, and practice. From Neurons to Neighborhoods: An Update: Workshop Summary emphasizes that there is a single, integrated science of early childhood development despite the extent to which it is carved up and divided among a diversity of

Professional disciplines, policy sectors, and service delivery systems. While much work still remains to be done to reach this goal, the 2010 workshop demonstrated both the promise of this integrated science and the rich diversity of contributions to that science.

How children ' s development is shaped by Early Childhood Education and Care (ECEC) classrooms and especially by teacher–child interactions in those settings is a major issue in research and politics, which has been researched for several decades. This book investigates this important topic by raising three overarching questions: (1) What are ' good ' teacher–child interactions and how they can be measured? (2) Which individual and/or contextual

aspects are associated with teacher–child interactions? (3) What is the impact of teacher–child interactions on the development of children's competencies? The book ties in these fundamental questions with educational research by bringing together international studies from interdisciplinary backgrounds and presenting current research on the characteristics, predictivity, dependency, and methodological issues of teacher–child interactions in ECEC classrooms. The considered studies conducted in Australia, Austria, Finland, Germany, Greece and Portugal each aim to enrich the scientific discourse and provide fruitful implications for policy and practice. This book was originally published as a special issue of the Research Papers in Education journal.
