Equus is a play by Peter Shaffer written in 1973, telling the story of a psychiatrist who attempts to treat a young man who has a pathological religious fascination with horses. Shaffer was inspired to write Equus when he heard of a crime involving a 17-year-old who blinded six horses in a small town in Suffolk.

Equus is a genus of mammals in the family Equidae, which includes horses, donkeys, and zebras. Within Equidae, Equus is the only recognized extant genus, comprising seven living species. Like Equidae more broadly, Equus has numerous extinct species known only from fossils. The genus most likely originated in North America and spread quickly to the Old World.

The Equus appears like a mixture of zebra and a large modern breed of domestic horse. It has a long wild mane, zebra like stripes, a tail like a horse and a shaggy beard like a goat's. From the dossier it appears to be comparable to larger horse breeds in terms of size, such as the Shire horse. Color Scheme and Regions
