In this new edition of their groundbreaking book *Strategies That Work*, Stephanie Harvey and Anne Goudvis share the work and thinking they've done since the second edition came out a decade ago and offer new perspectives on how to explicitly teach thinking strategies so that students become engaged, thoughtful, independent readers. Thirty new lessons and new and revised chapters shine a light on children's thinking, curiosity, and questions. Steph and Anne tackle close reading, close listening, text complexity, and critical thinking in a new chapter on building knowledge through thinking-intensive reading and learning. Other fully revised chapters focus on digital reading, strategies for integrating comprehension and technology, and comprehension across the curriculum. The new edition is organized around three sections: Part I provides readers with a solid introduction to reading comprehension instruction, including the principles that guide practice, suggestions for text selection, and a review of recent research that underlies comprehension instruction. Part II contains lessons to put these principles into practice for all areas of reading comprehension. Part III shows you how to integrate comprehension instruction across the curriculum and the school day, particularly in science and social studies. Updated bibliographies, including the popular "Great Books for Teaching Content," are accessible online. Since the first publication of *Strategies That Work*, more than

a million teachers have benefited from Steph and Anne's practical advice on creating classrooms that are incubators for deep thought. This third edition is a must-have resource for a generation of new teachers--and a welcome refresher for those with dog-eared copies of this timeless guide to teaching comprehension.

Grades are imperfect, shorthand answers to "What did students learn, and how well?" In *How to Use Grading to Improve Learning*, best-selling author Susan M. Brookhart guides educators at all levels in figuring out how to produce grades—for single assignments and report cards—that accurately communicate students' achievement of learning goals. Brookhart explores topics that are fundamental to effective grading and learning practices: "Acknowledging that all students can learn" "Supporting and motivating student effort and learning" "Designing and grading appropriate assessments" "Creating policies for report card grading" "Implementing learning-focused grading policies" "Communicating with students and parents" "Assessing school or district readiness for grading reform" The book is grounded in research and resonates with the real lessons learned in the classroom. Although grading is a necessary part of schooling, Brookhart reminds us that children are sent to school to learn, not to get grades. This highly practical book will help you put grading and learning into proper perspective, offering strategies you can use right away to ensure that your grading practices actually support student learning.

Grades should reflect and motivate learning. This book is relatable, relevant, and effective in improving educators' assessment and reporting processes and supporting students' motivation to learn. Understand how to grade individual assignments and give report card grades that
