From "accelerated depreciation" (amortizaci\u00f3n acelerada) to "yield spread" (diferencia de rendimiento), from "currency risk" (riesgo cambiario) to "placement on commission" (colocaci\u00f3n a comisi\u00f3n), communicating with Spanish-dominant clients and colleagues is now a breeze. This book is primarily intended for U.S.-born Latinos who are English-dominant. It is also a useful refresher for non-Hispanic Americans who learned Spanish in school, or who want to refresh their business Spanish vocabulary and usage. This dictionary is as indispensable as a computer password.

In the field of business, finance and economy, the English language has taken first place, even between people, institutions and countries whose respective native tongues are foreign to the English language. Spanish has become a very necessary language in different countries, thus, the combination of both languages provides an instrument of communication that is indispensable and unavoidable. This dictionary takes into account the frequent difficulties which economists, financiers, interpreters and others may have, in fully understanding the scope of a given field, expressions or even words, that in the highly specialised jargon of economics have acquired very concise meanings. Intensive research into definitions in the extremely vast field of economics, finance and business, has produced a dictionary well designed to fulfill the needs of users of a two-language dictionary. Proper and very factual explanations and definitions are given for each word or group of words, thus making absolutely clear to professionals which term to use.

Annotation Provides business and economy vocabulary.

This new dictionary provides a ready reference to essential terms and phrases used in all areas of law and business, including accounting, banking, civil law, civil procedure, contracts, corporate law, criminal law, criminal procedure, economics, intellectual property, labor law, real property, secured transactions, securities law, and torts. Written by an American attorney who is also an accredited translator, it provides complete coverage of terminology used in all Spanish-speaking countries, not just those countries where the other bilingual dictionaries on the market were written (i.e., Spain and Argentina). The dictionary was thoroughly researched using original documents and monolingual dictionaries from the Spanish-speaking various countries and is thus authoritative and up-to-date. No lawyer or translator who works with Spanish legal and business documents can afford to be without it.

In 2011 the World Bank\u2013with funding from the Bill and Melinda Gates Foundation\u2013launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account\u2013as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures\u2013along with the

questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

We are all using dangerous, outdated, old economic strategies to protect and grow our money in the so-called 'new economy.' Most of us don't even know it. Every economy is, in some sense, 'new.' However, applying the rules from an 'older' economy to a 'newer' one during times of transition is a recipe for financial ruin. Economic transitions have been around for centuries . . . the difference is that now they are worldwide in scope and affect everything rather than local in nature with limited affects. While you sleep at night, while you go to work each day, something insidious is actually stealing your financial future. It isn't anyone's fault really. There is a massive reallocation of wealth as we transition into the new economy. There are two sides to this story. Because of the changing rules of money, the greatest transfer of wealth in the nation and the world is now unfolding. Money is about to flow away from the financially uninformed and flow towards the financially well-informed in the years ahead. This is nothing new, really. Money has always worked this way. The good news is that average members of the public now have more ways than ever before to understand this process and to take appropriate action. I am sure you are aware of the rising price of gold that's been going on for almost 10 years now. Most recently, gold started climbing with even greater speed. History repeats itself again and again. Whenever governments start to dilute their money investors transfer their money into gold. Gold has intrinsic value and will always prevail in any economy. What most non-investors and investors -- including yourself -- probably you don't realize is that although gold is a great way to preserve your wealth, it's silver that could actually make you rich! The price of gold has already risen dramatically, but silver is just beginning its climb. Nine Reasons Why Silver is a Unique Wealth Building Instrument - Silver, like gold, has intrinsic value- Silver has been in a commodity bull cycle since 2000- Silver is a safe hedge against currency inflation- Silver is a security choice during times of financial crisis- Silver is rarer than gold- Silver is used in 90% of all electronics -- and its mostly non-renewable- Silver inventories are very low- Silver leasing -- the scam will be exposed soon- Silver investment markets are expanding thanks to the Chinese What You Will Learn From Building Wealth with Silver You will discover why the Federal Reserve was created and why you and I have been kept in the dark about its true purpose. You will find out why the U.S. dollar is quietly being destroyed without fanfare and the reason this process is being publically denied and covered up. You will see why unemployment numbers, along with many other economic figures, are rigged, and how we're are being lied to about their true significance. The insights you get from the first few chapters alone can change your life. Even if you were to study at Harvard for five years -- which would cost you, by the way, over \$95,000 -- you would not have the knowledge you need to get any closer to this kind of insider information. Learn why silver is the best investment opportunity right now. Get the facts on silver production and consumption, and all the details behind silver's projected five- to eight-fold increase over the next several months.
