The psychiatric mental health nurse identifies expected outcomes individualised to the patient. Within the context of providing nursing care, the ultimate goal is to influence health outcomes and improve the patient's health status.

[Nursing Process in Psychiatric Nursing](#)

2. ensuring access to health care 3. encouraging and providing support (for families, individuals, organizations) 4. providing ongoing education 5. providing mentoring 6. supporting patients with defining their personal life goals and in their efforts to achieve those goals 7. reducing the stigma associated with mental disorders (page 2)

Provides a balanced nursing and medical approach with strong coverage of DSM-IV and related treatments. Nursing process is treated as a separate section in relevant chapters. Nursing process sections include comprehensive nursing care plans. Text also addresses the biological revolution and new concepts in health care delivery, the clients' psychosocial needs and the behavior of nurses and associated professionals to attain, maintain and promote the clients' integrity related to those needs.

Accompanying CD-ROM has review questions for the NCLEX examination, interactive exercises, animations, and an audio glossary.

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses. Thoroughly revised and updated to reflect current research and the UK guidelines as well as the changing attitudes about mental health, mental health services and mental health nursing in UK. Set within a recovery and patient framework, this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice, along with helpful suggestions about what the mental health nurse can say and do to interact effectively with patients and their families. Gives readers a thorough grounding in the theory of mental health nursing. Case studies throughout the text allow readers to understand the application of theory in every day practice. Includes critical thinking challenges and ethical dilemmas to encourage the reader to think about and explore complex issues. Exercises for class engagement complement learning and development in the classroom environment.

Focusing on what psychiatric nurses actually do in everyday practice, Psychiatric Mental Health Nursing, 5th Edition, uses a balanced nursing-medical approach to cover all of the most common disorders and treatments. The text's full-color illustrations and straightforward style help you make sense of challenging material. And its strong emphasis on the nursing process, updated DSM-IV-TR diagnostic criteria, interdisciplinary interventions, and the latest mental health practices boost your confidence in managing clients and prepare you for success on the NCLEX examination. UNIQUE! Balanced nursing-medical approach offers strong baseline coverage of the nursing process and interdisciplinary interventions and focuses on what psychiatric nurses actually do. Complete coverage of the nursing process features the six-step problem-solving method and how to put it into practice. DSM-IV-TR Criteria boxes list categories of mental disorders and the criteria for diagnosing them. Nursing care plans provide care guidelines for each plan and include a brief case study, followed by assessment, diagnosis, goal setting, interventions with rationales, and evaluation. UNIQUE! Clinical Alert boxes address issues critical to the safety or well-being of the client. Case studies depict effective nursing care strategies and promote critical thinking. Research for Evidence-Based Practice boxes discuss the implications of current research studies. Client and Family Teaching Guidelines boxes focus on the issues confronting families when a member suffers from mental illness. UNIQUE! Medication Key Facts boxes highlight the most common psychopharmacologic interventions along with safe and effective use. Nursing Assessment Questions boxes include questions that should be asked in the assessment of a particular disorder. Clinical Symptoms boxes help you apply content to the real world. Additional Treatment Modalities boxes summarize other modalities and interventions used in conjunction with nursing interventions in the treatment of a particular disorder. Chapter summaries conclude each chapter with the most significant ideas to remember. Review questions with answers in the appendix offer immediate reinforcement of chapter content and help you prepare for the NCLEX Examination. Glossary provides concise definitions of key terms. Objectives and key terms emphasize the most important concepts from each chapter.

Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010.

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

Varcarolis' Foundations of Psychiatric-Mental Health Nursing, 8th Edition is the most comprehensive RN psychiatric nursing text on the market! Awarded second place in the 2018 AJN Book of the Year Awards in Psychiatric Mental Health Nursing category. User-friendly by design, it simplifies the often-intimidating subject of psychiatric-mental health nursing with a practical, clinical perspective. This edition was revised in conjunction with a readability expert to support clarity and ease of understanding. Chapters follow the nursing process framework and progress from theory to application, preparing your students for clinical practice with real-world examples. New to this edition are full-page illustrated explanations about the neurobiology of disorders and associated medications, criteria from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-5) for major disorders, completely revised Evidence-Based Practice boxes, and a fully rewritten chapter on Dying, Death, and Grieving to provide students with essential information about difficult topics. Mentor-like writing style reinforces important information and helps in applying textbook content to the clinical setting. Coverage of key topics and emerging nursing trends keep you current with best practices in the field. Considering Culture boxes discuss the importance of person-centered care in providing competent care to diverse populations in various clinical situations. Vignettes with vivid mini-stories prepare you for real-world practice with personal, descriptive characterizations of patients with specific psychiatric disorders. Health Policy Boxes introduce the role you can play in advocating for patients and the profession. Clinical chapters follow the six-step nursing process, providing consistent guidelines for comprehensive assessment and intervention. NEW! Full-page illustrated explanations about the neurobiology of disorders and associated medications. NEW! DSM-5 guidelines from the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders are fully incorporated in the text, and include updated NANDA content. NEW! Completely revised Evidence-Based Practice boxes. NEW! Revised chapter on Dying, Death and Grieving gives you all the vital information you need. NEW! Ten NCLEX-style questions and answers at the end of each chapter.

An outstanding resource for students and practicing nurses, the Ninth Edition of Lippincott's Manual of Psychiatric Nursing Care Plans contains 52 nursing care plans that address the most commonly encountered behaviors in psychiatric-mental health nursing. An excellent tool to introduce students to clinical psychiatric experience, the Manual demonstrates use of the nursing process in psychiatric nursing and gives suggestions for specific interventions--with rationale--to address particular behaviors, giving the student a sound basis on which to build clinical skills. Covering a range of problems and a variety of approaches, the care plans are meant to be adapted and individualized in planning nursing care for each client. The Ninth Edition has been thoroughly updated and includes new information on complementary and alternative medicine and using the internet; as well as new or expanded appendices on psychopharmacology; side effects of medications and related nursing interventions; and schizoid, histrionic, narcissistic, and avoidant personality disorders.
