(The Center Square) — Many more Washington foster youth are living in a hotel room or a welfare office amid the COVID-19 pandemic and a dwindling number of willing foster parents. The news comes from a report written by ombudsman Patrick Dowd who found that out-of-home placements have climbed to 1,800 in 2020—up from just 120 in 2015.

Press Release Thought Industries Joins Forces with Van Noy Valor Foundation to Increase Opportunities to Foster Youth Published: Dec. 9, 2020 at 10:10 a.m. ET

Over 400,000 US youth are in foster care, mainly due to neglect and abuse by their parents. These youth endure instability as they move from home to home, and uncertainty about their future as others make the decision as to whether they should be reunited with their families or become available for adoption. Foster Youth presents a powerful, real-world look at the lives of these vulnerable young people.

Who are the forgotten? In the world of foster care there are many who have not been heard. The forgotten include, but are not limited to the children and youth in foster homes, tots and adolescents in institutions or children's homes, or those "throwaway" kids living in the garbage dumps or on the streets. ... IFCO, the International Foster Care Organization, is a committed band of people, spread across the globe, who care about, and care for the children, and many of the other forgotten ones, the families of the children, the caregivers, the social workers, the community. This book includes chapters from leading figures in foster care around the world. It also bears witness to more than thirty years of struggle and success to build an international network that has accomplished the following: * Working in many countries to move children from institutions to family care; * Providing a place where children and youth in care can be heard and empowered; * Advocating internationally for the United Nations Convention on Rights of Children. The story is powerful, shaking the soul and moving the conscience as we hear the voices of the forgotten ringing across the years.

Presents new ways of reaching out to teens in the classroom by offering essential principals for teaching, detailing guidelines for creating curriculum, and including examples of the authors' experiences teaching at an urban school.

A heart-rending but uplifting story of the human spirit ' s ability to prevail. From the day he is five-years-old and dropped off at his foster home of the next eleven years, Stephen is mentally and physically tortured. No one in the system can help him. No one can tell him if he has a family. No one can tell him why, with obvious African-American features, he has the last name of Klakowicz. Along the way, a single faint light comes only from a neighbor ' s small acts of kindness and caring—and a box of books. From one of those books he learns that he has to fight in any way he can—for victory is in the battle. His victory is to excel in school. Against all odds, the author succeeded. He attended college, graduated, became a successful corporate executive, and married a wonderful woman with whom he established a loving family of his own. Through it, he dug voraciously through records and files and found his history, his birth family—and the ultimate disappointment as some family members embrace him, but others reject him. Readers won ' t be the same after reading this powerful story. They will share in the hurts and despair but also in the triumph against daunting obstacles. They will share this story with their family, with their friends, with their neighbors.

The Oxford Handbook of Children and the Law presents cutting-edge scholarship on a broad range of topics covering the life course of humans from before birth to adulthood, by leading scholars in law, medicine, social work, sociology, education, and philosophy, and by practitioners in law and medicine. An international collection of authors presents and analyzes the law and science pertaining to reproduction; prenatal life (including fetal exposure to toxic substances and abortion); parentage (including biology-based rights, background checks on birth parents, adoption, the status of gamete donors, and surrogacy); infant development and vulnerability; child maltreatment (including corporal punishment and religious defences to abuse and neglect); child protection policy and systems; foster care; child custody disputes between parents or between parents and other caregivers; schooling (including financing, resegregation, religious expression in public schools, at-risk students, special education, regulation of private schools, and homeschooling); delinquency; minimum-age laws; and child advocacy. Most chapters follow a format wherein they first describe the most debated or dynamic issues in each topical area, then explain in depth the law and/or science pertaining to the author's particular focus, and finally offer arguments and recommendations as to law and policy in that area. The normative component aims to advance discussions and debates in vital areas of contemporary child welfare law and policy. The Handbook is an essential resource for scholars and professionals interested in the intersection of children and the law.

It is a great pleasure to offer this volume from Michael J. Nakkula, Karen C. Foster, Marc Mannes, and Shenita Bolstrom as the latest in the Search Institute Series on Developmentally Attentive Community and Society. Its importance to the series and this ?eld of inquiry and practice is readily evident in its title, Building Healthy Communities for Positive Youth Development. Since the early 1990s, Search Institute has invited and encouraged communities of all shapes and sizes to use its framework of Developmental Assets and principles of asset building to create strong, vibrant, and welcoming communities for children and youth. We have operated largely at the grassroots level, encouraging innovation and adaptation around a shared vision, rather than proposing a program or model for replication. We seek to learn as much from the communities as they learn from us. This book offers in-depth case studies of what happened in eight diverse c- munities that took up our invitation. In them, we see a wide array of strategies and approaches that, on the surface, seem to have little coherence. But, as Nakkula and colleagues found, underlying each of these distinct efforts was a deep commitment to transforming the social norms of community life to more effectively attend to young people ' s healthy development throughout the ?rst two decades of life. There have been many ambitious efforts aimed at comprehensive community change on behalf of young people.
