Abstract. 'The fundamentals of financial accounting' explores the basic ideas of financial accounting: the way accounting actually works, the logic behind the double-entry recording system, and the contents of the basic financial statements (balance sheet, income statement, and cash flow statement). The following questions are addressed: What does a balance sheet try to show?

1.Assets are the economic resources of a business that are expected to produce a benefit in the future.

Owners' equity represents the insider claims of a business, the owners' interest in its assets.

Assets and owners' equity differ in that assets are resources and owners' equity is a claim to assets.
