Research from Zengin, Furkan, & Kutluca  
(2012) has found that using GeoGebra to teach  
math has been proven to increase achievement  
scores in mathematics. The results of the  
study indicated that there was a significant  
difference between the means of the students'  
scores on the posttest in favor of the  
GeoGebra group when teaching mathematical  
concepts. Tatar (2012) also found a positive

Another advantage of Geogebra is that it  
allows the user to export the current file  
into a web ready format (a java applet) which  
can then be uploaded to a web server. This  
provides the ability for students and  
teachers to discuss and analyze each other's  
work, and allows for the creation of a social  
discussion about the work.

## What is GeoGebra?

I assume this is a very different situation, but I will mention the solution to the problem displaying GeoGebra files in Moodle that my friend was having, in case it helps anyone: it was the php Suhosin extension settings. (The Suhosin extension is an optional php security patch which was set up on his server.) His tried setting the suhosin ...

GeoGebra is a very useful mathematics tool for education in secondary schools, which brings together geometry, algebra and calculus. GeoGebra is also a dynamic geometry system, meaning you can do constructions with points, segments, vectors, lines, conic sections as well as functions and change them dynamically afterwards. On the other hand, equations and coordinates can be entered directly ...
