## Calculating Perimeter and Circumference Geometry 1.8 Perimeter Circumference and Area Example 1 Geometry Perimeter Circumference And Area

The circumference is the perimeter of a circle. It is a length and so is measured in  $(\text{mm})$ ,  $(\text{cm})$ ,  $(\text{m})$  or  $(\text{km})$ . An area is measured in square units:  $(\text{mm}^2)$ ,  $(\text{cm}^2)$ ,  $(\text{m}^2)$ ...

### ~~Circumference and area of a circle Perimeter and area ...~~

Draw a rectangle and label the length and width. Perimeter =  $2l + 2w$ .  
Perimeter =  $2(12) + 2(5)$  Perimeter =  $24 + 10$ . Perimeter = 34. Area =  
 $lw$ . Area =  $12 \cdot 5$ . Area = 60. So, the perimeter is 34 inches and the area is 60 square inches.

~~Math Antics - Circles, Circumference And Area - YouTube~~

How to find the circumference of a circle. Determine the radius of a circle. Let's assume it's equal to 14 cm. Substitute this value to the formula for circumference:  $C = 2 * \pi * R = 2 * \pi * 14 = 87.9646 \text{ cm}$ . You can also use it to find the area of a circle:  $A = \pi * R^2 = \pi * 14^2 = 615.752 \text{ cm}^2$ .

~~Circumference Calculator~~

Circumference: the Perimeter of a Circle. Circumference = diameter  $\times \pi = 2 \times r \times \pi = 2 \pi r = d \pi$ . One neat thing about circles is that all circles are similar. The ratio of any circle's circumference/diameter is equal to one very extraordinary number,  $\pi$  (or "pi").
