About the Author. John Lennox is Professor of Mathematics at the University of Oxford and Fellow in Mathematics and Philosophy of Science at Green Templeton College. He lectures on Faith and Science for the Oxford Centre for Christian Apologetics.

God's Undertaker: Has Science Buried God?: Lennox, John C ...

It is no part of the biblical view that things should be believed where there is no evidence. Just as in science, faith, f16 God ' s Undertaker reason and evidence belong together. Dawkins ' definition of faith as ' blind faith ' turns out, therefore, to be the exact opposite of the biblical one.

God ' s Undertaker: Has Science Buried God? | John C. Lennox ...

John C. Lennox. If we are to believe many modern commentators, science has squeezed God into a corner, killed and then buried him with its all-embracing explanations. Atheism, we are told, is the only intellectually tenable position, and any attempt to reintroduce God is likely to impede the progress of science.

God ' s Undertaker: Has Science Buried God? | John C. Lennox ...

Dawkins insists on seeing God as an explanatory alternative to science; but no theologian does. Some atheists claim God gets in the way of science. Worshipping bits of nature certainly does, as does a mythological worldview. Monotheism doesn ' t. Xenophanes (C6BC): ' there is one God.. similar to mortals neither in shape nor in thought..

John Lennox: God ' s Undertaker—has science buried God?

God ' s Undertaker: Has Science buried God?, Lion Hudson plc 2009, Page 20] Melvin Calvin, Nobel Prize-winner in biochemistry, seems in little doubt about its provenance: ' As I try to discern the origin of that conviction, I seem to find it in a basic notion discovered 2,000 or 3,000 years ago, and

God ' s Undertaker: Has Science buried God? By: John C. Lennox

- naturalist thinkers tell us that science has eliminated God whereas scientists who are theists tell us that science confirms their faith in God. P.20. - science based on the conviction that the universe is orderly. Comes from the conviction that the universe is governed by a single God and not by the whims of many gods (p.20).

God's Undertaker: Has Science Buried God?: Lennox, John ...

Professor Lennox in this book provides the readers with a broad spectrum of scientists that hold one of the position: either the science has buried God, or the opposite position that the science is a proof of the word of God.

Looks at the relationship between science and religion, and argues that theism may fit science better than atheism.

Evaluates the evidence of modern science in relation to the debate between the atheistic and theistic interpretations of the universe, and provides a fresh basis for discussion. The book has grown out of the author's lengthy experience of lecturing and debating on this subject in the UK, USA, Germany and Russia, and has been written in response to endless requests for the argumentation in written form.

The Grand Design, by eminent scientist Stephen Hawking, is the latest blockbusting contribution to the so-called New Atheist debate, and claims that the laws of physics themselves brought the Universe into being, rather than God. In this swift and forthright reply, John Lennox, Oxford mathematician and author of God's Undertaker, exposes the flaws in Hawking's logic. In lively, layman's terms, Lennox guides us through the key points in Hawking's arguments - with clear explanations of the latest scientific and philosophical methods and theories - and demonstrates that far from disproving a Creator God, they make his existence seem all the more probable.

Atheism is on the march in the western world, and its enemy is God. Religion, the "New Atheists" claim, "is dangerous", it "kills" or "poisons everything". And if religion is the problem with the world, their answer is simple: get rid of it. But are things really so straightforward? Tackling the likes of Richard Dawkins, Stephen Hawking, Christopher Hitchens, and Daniel Dennett head on, John Lennox highlights the fallacies in the their approach, arguing that their irrational and unscientific methodology leaves them guilty of the same obstinate foolishness of which they accuse dogmatic religious folks. Erudite and wide-ranging, Gunning for God packs some debilitating punches. It also puts forward new ideas about the nature of God and Christianity that will give the New Atheists' best friends and worst enemies alike some stimulating food for thought.

What did the writer of Genesis mean by " the first day " ? Is it a literal week or a series of time periods? If I believe that the earth is 4.5 billion years old, am I denying the authority of Scripture? In response to the continuing controversy over the interpretation of the creation narrative in Genesis, John Lennox proposes a succinct method of reading and interpreting the first chapters of Genesis without discounting either science or Scripture. With examples from history, a brief but thorough exploration of the major interpretations, and a look into the particular significance of the creation of human beings, Lennox suggests that Christians can heed modern scientific knowledge while staying faithful to the biblical narrative. He moves beyond a simple response to the controversy, insisting that Genesis teaches us far more about the God of Jesus Christ and about God ' s intention for creation than it does about the age of the earth. With this book, Lennox offers a careful yet accessible introduction to a scientifically-savvy, theologically-astute, and Scripturally faithful interpretation of Genesis.

Determined to Believe? is written for those who are interested in or even troubled by questions about God's sovereignty and human freedom and responsibility. John Lennox writes in the spirit of helping people to come to grips with the biblical treatment of this issue for themselves. In this comprehensive review of the topic of theological determinism, Lennox seeks firstly to define the problem, looking at the concepts of freedom, the different kinds of determinism, and the moral problems these pose. He then equips the reader with biblical teaching on the topic and explores the spectrum of theological opinion on it. Following this, Lennox delves deeper into the Gospels and then investigates what we can learn regarding determinism and responsibility from Paul's discussion in Romans on God's dealings with Israel. Finally Lennox tackles the issue of Christian assurance. This nuanced and detailed study challenges some of the widely held assumptions in the area of theological determinism and brings a fresh perspective to the debate.

This book evaluates the evidence of modern science in relation to the debate between the atheistic and theistic interpretations of the universe, and provides a fresh basis for discussion. The book has grown out of the author's lengthy experience of lecturing and debating on this subject in the UK, USA, Germany and Russia, and has been written in response to endless requests for the argumentation in written form. - Publisher.

Daniel's story is one of extraordinary faith in God lived out at the pinnacle of executive power. It tells of four teenage friends, born in the tiny state of Judah about twenty-six centuries ago, but captured by Nebuchadnezzar, emperor of Babylon. Daniel describes how they eventually rose to the top echelons of administration. Daniel and his friends did not simply maintain their private devotion to God; they maintained a high-profile witness in a pluralistic society antagonistic to their faith. That is why their story has such a powerful message for us. Society tolerates the practice of Christianity in private and in church services, but it increasingly deprecates public witness. If Daniel and his compatriots were with us today they would be in the vanguard of the public debate. What was it that gave that ancient foursome, Daniel and his three friends, the strength and conviction to be prepared, often at great risk, to swim against the flow?

How belief in a loving and sovereign God helps us to make sense of and cope with the coronavirus outbreak. We are living through a unique, era-defining period. Many of our old certainties have gone, whatever our view of the world and whatever our beliefs. The coronavirus pandemic and its effects are perplexing and unsettling for all of us. How do we begin to think it through and cope with it? In this short yet profound book, Oxford mathematics professor John Lennox examines the coronavirus in light of various belief systems and shows how the Christian worldview not only helps us to make sense of it, but also offers us a sure and certain hope to cling to.
