Try active relaxation. Relaxation doesn't have to mean sitting still – gentle exercise can help you relax too. Take a walk, going at your own pace. You might choose to go for a longer walk, but even a few minutes of walking can help you feel relaxed. Look for a class you'd like to try, such as yoga, Pilates or gentle stretching.

Breathing exercise for stress This calming breathing technique for stress, anxiety and panic takes just a few minutes and can be done anywhere. You will get the most benefit if you do it regularly, as part of your daily routine. You can do it standing up, sitting in a chair that supports your back, or lying on a bed or yoga mat on the floor.

**Breathing exercise for stress - NHS**

Relaxation is allowing physical and/or mental tension to be released. Tension is the body's natural response to threat, part of the body's alarm or survival mechanism. It can be a very useful response, but a lot of the time, we don't need this tension, so it's okay to learn to let it go, and learn some relaxation skills.

**Relaxation - Getselfhelp.co.uk**

Relaxation techniques can help to relax the mind and body and also manage some of the symptoms of anxiety and depression. There are many types of relaxation, including breathing exercises, progressive muscle relaxation, visualisation, meditation, mindfulness, and gentle physical activities such as yoga and Tai Chi.

Choosing the breathing exercise that's right for you There are countless techniques you can practice, including breathing exercises for stress, increased energy, and general relaxation. The simplest breathing technique is to count your breaths. You start by counting 1 on the inhale, 2 on the exhale, 3 on the inhale, and so forth.

**Breathing Exercises to Help Reduce Stress - Headspace**

Relaxation techniques include a number of practices such as progressive relaxation, guided imagery, biofeedback, self-hypnosis, and deep breathing exercises. The goal is similar in all: to produce the body's natural relaxation response, characterized by slower breathing, lower blood pressure, and a feeling of increased well-being.
