Health & Sickness -- Consumer Health --> This book by a scientist whose background is in cellular and molecular biology examines the fearsome disease that strikes one in eight women in the United States. Although women are more likely to die of heart disease or of lung cancer, a diagnosis of breast cancer is the medical pronouncement that a woman is most likely to fear. It kills more than 40,000 Americans annually. Why are some women more vulnerable than others? The interplay between genetics and environment is suspected. Thus this book for general readers will help them understand the genetic bases of both sporadic and inherited breast cancers. Although only five to ten percent of breast cancer patients have inherited mutations in these genes, all women need to understand the genetic implications of the disease. In clear, concise language Barbara T. Zimmerman guides the reader through the complexities, discussing in detail the genes that are known to increase susceptibility and the ways they are passed on. Examining the general biology of breast cancer, Zimmerman describes how sporadic and inherited forms of the disease arise and how the location of the tumors can affect the body. She discusses genetic mutations and their roles in the development of tumors and tells how these potentially cancer-inducing genes were discovered. Covered too are the issues of risk, prevention, screening, diagnosis, therapy, and genetic testing and counseling. Zimmerman concludes with a comprehensive analysis of current research and with an emphasis on how a woman's understanding of inherited breast cancer can help doctors seeking to design better methods for prevention and therapy. A useful list of resources for further information about the genetic causes of breast cancer is included. Barbara T. Zimmerman did her graduate work in experimental pathology and her post-doctoral research in the cellular and molecular processes of disease. Widely published, she is the manager of the Denver-based firm Biomedical Communication and Consulting.

"One icy winter's evening in Budapest, a man runs straight into John Taylor as he walks home through the narrow streets. John falls over into the snow and looks up at the man's face. 'I felt very afraid. Because what I saw was me. My face looking down at me. My mouth saying sorry.' Who is the man, and how will John's life change?"

Selected for The Globe 100 Books in 2013. With the 2013 CBC Massey Lectures, bestselling author Lawrence Hill offers a provocative examination of the scientific and social history of blood, and on the ways that it unites and divides us today. Blood runs red through every person's arteries and fulfills the same functions in every human being. The study of blood has advanced our understanding of biology and improved medical treatments, but its cultural and social representations have divided us perennially. Blood pulses through religion, literature, and the visual arts. Every time it pools or spills, we learn a little more about what brings human beings together and what pulls us apart. For centuries, perceptions of difference in our blood have separated people on the basis of gender, race, class, and nation. Ideas about blood purity have spawned rules about who gets to belong to a family or cultural group, who enjoys the rights of citizenship and nationality, what privileges one can expect to be granted or denied, whether you inherit poverty or the right to rule over the masses, what constitutes fair play in sport, and what defines a person's identity. Blood: The Stuff of Life is a bold meditation on blood as an historical and contemporary marker of identity, belonging, gender, race, class, citizenship, athletic superiority, and nationhood.

Debra Fisher has always felt like she was different from her family, and one day, she learns the truth. She was adopted as an infant, taken in by a kind Amish family that raised her as their own. But now, at nineteen, Debora wants to know more about her past, and begins a search for her real mother. Guided by Gott into the path of the handsome young Jacob Lapp, Debora learns a clue to her mother's identity. He might know who her mother is-and she might be an Englisher! Soon, Jacob and Debora are traveling together to meet this mysterious woman. But the closer she gets to her answer, the more reluctant Debora is to reach it-and to leave Jacob. Jacob Lapp has made his way into her heart, and now she has entirely new questions on her mind. Could he ever love her-a poor girl abandoned by her mother? Does he even know how she feels? Sometimes, Gott brings us unexpected answers to questions we didn't know we had.
