changing. Around the world, more and more money is being invested in buildings and land. Real estate is now a \$217 trillion dollar industry, worth thirty-six times the value of all the gold ever mined. It forms sixty percent of global assets, and one of the most powerful people in the world—the president of the United States—made his name as a landlord and developer. Samuel Stein shows that this explosive transformation of urban life and politics has been driven not only by the tastes of wealthy newcomers, but by the state-driven process of urban planning. Planning agencies provide a unique window into the ways the state uses and is used by capital, and the means by which urban renovations are translated into rising real estate values and rising rents. Capital City explains the role of planners in the real estate state, as well as the remarkable power of planning to reclaim urban life.

Carole King's *Tapestry* is both an anthemic embodiment of second-wave feminism and an apotheosis of the Laurel Canyon singer-songwriter sound and scene. And these two elements of the album's historic significance are closely related insofar as the professional autonomy of the singer-songwriter is an expression of the freedom and independence women of King's generation sought as the turbulent sixties came to a close. Aligning King's own development from girl to woman with the larger shift in the music industry from teen-oriented singles by girl groups to albums by adult-oriented singer-songwriters, this volume situates *Tapestry* both within King's original vision as the third in a trilogy (preceded by *Now That Everything's Been Said* and *Writer*) and as a watershed in musical and cultural history, challenging the male dominance of the music and entertainment industries and laying the groundwork for female dominated genres such as women's music and Riot Grrrl punk.
