Capital structure is a blend of company's sources of finance and consists of several types of funding. To be more specific, capital structure is a ratio of short-term, long-term liabilities and equity. Depending on the sources of financing, we can distinguish borrowed (or debt) capital and equity (owner's capital).

Factors affecting Capital Structure Decisions ...

This paper investigates whether a dynamic capital structure model can explain the cross-sectional size-leverage relationship. The driving force that we consider is the presence of fixed costs of external financing that lead to infrequent restructuring and create a wedge between small and large firms. We find four firm-size effects on leverage.
