Influence Of

mechanical properties of ductile iron alloy. Lower austempering temperatures, it has high hardness, due to the presence of a very thin ferrite.

INFLUENCE OF AUSTEMPERING TIME AND AUSTEMPERING ...

In case of single-step austempering, with

Online Library

Influence Of

further increase in temperature, ferrite volume fraction decreased substantially to a critical value (about 69%) at 343 °C or 650 °F. This temperature is termed as critical austempering temperature (T_{AC}), where the dominant effect of ferrite volume

Online Library

Influence Of

fraction is greatly decreased.

Meanwhile, the total contribution from interactions between dislocations and carbon atoms also decreased significantly because of less ferrite in the matrix.

Influence of a novel two-step

Online Library

Influence Of

austempering process
on the ...

In this investigation a new low carbon and low alloy (LCLA) (Third generation AHSS) steel with exceptional combination of yield strength and fracture toughness has been developed. The steel has been processed using a novel two step

Online Library

(2007). Influence of austenitising and austempering temperatures on microstructure and properties of dual phase ADI. Materials Science and Technology: Vol. 23, No. 11, pp. 1321-1326.

Influence of

Online Library

Influence Of

austenitising and austempering temperatures ...

The phenomenon, hardness lag of the alloyed bainite ductile cast Iron, has been discussed. It shows that after the step austempering in room-temperature machine oil, the hardness will increase with the time. It is found that

Online Library

Influence Of

boron and manganese can increase the hardness and reduce the impact strength while copper can increase the impact strength.
