This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury.

Oracle Database Database Installation Guide, 19c for Linux

Veritas supports two media server installation methods: either the NetBackup installation script or the native UNIX and Linux installers. The NetBackup installation script is the standard installation method and is recommended for new users. The native UNIX and Linux installers are potentially more difficult and require additional steps.

SAS provides a script (setuid.sh) with which to set certain SAS installation files with setuid permissions and root ownership. The setuid.sh script must be run as root in order to complete successfully. You have three options for running setuid.sh: Set up sudo for the SAS Installer before running the deployment wizard.

SAS Help Center - Deploying SAS Foundation

The actual installation of the external databases, which are Oracle, DB2, and Informix, is outside the scope of this document. The process to install these databases is described in separate installation guides per RDBMS. UNIX keywords, path names, and so on are printed in bold (case-sensitive). For example, the cpio command is **cd \$BSE/bin**.
