An honest discussion of free trade and how nations can sensibly chart a path forward in today's global economy Not so long ago the nation-state seemed to be on its deathbed, condemned to irrelevance by the forces of globalization and technology. Now it is back with a vengeance, propelled by a groundswell of populists around the world. In Straight Talk on Trade, Dani Rodrik, an early and outspoken critic of economic globalization taken too far, goes beyond the populist backlash and offers a more reasoned explanation for why our elites' and technocrats' obsession with hyper-globalization made it more difficult for nations to achieve legitimate economic and social objectives at home. Ranging over the recent experiences of advanced countries, the eurozone, and developing nations, Straight Talk on Trade charts a way forward with new ideas about how to reconcile today's inequitable trends with liberal democracy and social inclusion.

"Should be required reading for all policy makers." —Warren Buffett From the three primary architects of the American policy response to the worst economic catastrophe since the Great Depression, a magnificent big-picture synthesis—from why it happened to where we are now. In 2018, Ben Bernanke, Tim Geithner, and Hank Paulson came together to reflect on the lessons of the 2008 financial crisis ten years on. Recognizing that, as Ben put it, "the enemy is forgetting," they examine the causes of the crisis, why it was so damaging, and what it ultimately took to prevent a second Great Depression. And they provide to their successors in the United States and the finance ministers and central bank governors of other countries a valuable playbook for reducing the damage from future financial crises. Firefighting provides a candid and powerful account of the choices they and their teams made during the crisis, working under two presidents and with the leaders of Congress.
