In all enterprises around the world, the issues, opportunities and challenges of aligning IT more closely with the organization and effectively governing an organization's IT investments, resources, major initiatives and superior uninterrupted service is becoming a major concern of the Board and executive management. An integrated and comprehensive approach to the alignment, planning, execution and governance of IT and its resources has become critical to more effectively align, integrate, invest, measure, deploy, service and sustain the strategic and tactical direction and value proposition of IT in support of organizations. Despite the publication of several studies examining European retailing in relation to the USA, there is still a dearth of recent research, in English, that explores the development of retailing in specific European countries (with the obvious exception of Britain), over the twentieth century. Even for the UK, more research is needed to challenge claims such as the alleged "backwardness" of British retailing relative to North America, or the presence of formidable "environmental" barriers to the "industrialisation" of retailing in Britain. New Perspectives on 20th Century European Retailing showcases new research on various aspects of twentieth century European retailing, that challenges the traditional view that Europe was a "follower" of America in retail innovation. It brings together work by several - mainly early career - scholars, who are doing innovative, archival-based, research on various aspects of European retail history. Following a general review of European retailing by the editors (discussing key debates and new approaches) seven thematic chapters present work that either sheds new light on old debates and/or explores hitherto neglected topics. Collectively, they show that whereas retailers are often regarded as 'intermediaries', in fact they are actors in their own right and they challenge the

traditional view that Europe was a "follower" of America in retail innovation. The chapters in this book were originally published as a special issue of the Business History journal.
