Today's educators are tired, burned out and overwhelmed. Today's students are distracted, reactive and demonstrate poor coping skills. Add a year of a teaching and learning during a pandemic and the effects of collective trauma can be felt by everyone in a school community. Are you finding it hard to manage all of the behaviors in your classroom? (whether it is virtual or live) Are you having difficulty keeping students engaged and attentive? Has this pandemic made it even harder to meet the emotional needs of your students who desperately seek safety, security, and connection? As trauma, adversity, mental health challenges, developmental differences and behavioral issues flood the classroom, it is hard to meet the needs of all students and have time to teach critical curriculum content. With science-backed strategies and easy to implement tools, Allison Morgan, pediatric occupational therapist and founder of Zensational Kids, LLC guides you in transforming classroom chaos into compassionate calm in 2 minutes or less through specific breath, movement and mindfulness practices. Designed for the busy educator who dreams of creating more resilience, ease and joy in their career and their classroom while empowering students to develop self-awareness and self-management tools. Developed with the well-being of both educators and students in mind, EDUCATE 2B offers 40 step by step, illustrated breath, movement and mindfulness practices. Each practice supports the nervous system in becoming: Calm Focused Compassionately Connected Energetically Balanced Ready to Learn and Restored Social Emotional competency alignment as well as suggestions for integrating PBIS models (Positive Behavioral Supports) and RTI (Response to Intervention) are provided. Trauma-informed guidelines and

restorative practices to promote healing, safety and connection

The U.S. Census Bureau has reported that 56.7 million Americans had some type of disability in 2010, which represents 18.7 percent of the civilian noninstitutionalized population included in the 2010 Survey of Income and Program Participation. The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) program. As of December 2015, approximately 11 million individuals were SSDI beneficiaries, and about 8 million were SSI beneficiaries. SSA currently considers assistive devices in the nonmedical and medical areas of its program guidelines. During determinations of substantial gainful activity and income eligibility for SSI benefits, the reasonable cost of items, devices, or services applicants need to enable them to work with their impairment is subtracted from eligible earnings, even if those items or services are used for activities of daily living in addition to work. In addition, SSA considers assistive devices in its medical disability determination process and assessment of work capacity. The Promise of Assistive Technology to Enhance Activity and Work Participation provides an analysis of selected assistive products and technologies, including wheeled and seated mobility devices, upper-extremity prostheses, and products and technologies selected by the committee that pertain to hearing and to communication and speech in adults.

So, you've just been diagnosed with bipolar disorder, also known as manic depression. The first thing I want to tell you is that the world is not over! Life does continue. Even though you are probably looking through this booklet while in a psychiatrist's office or a hospital room, life does go on - and happily, I might add! The fact that you have this disorder is simply another challenge to deal with, and should be regarded as such. Of course, being bipolar is a special challenge. It's not like studying for a test or performing well in a sporting event. It comes with a whole new group of emotions and situations. What this booklet will do is help you get through the next few months of your life.

This textbook covers the entire Business Process Management (BPM) lifecycle, from process identification to process monitoring, covering along the way process modelling, analysis, redesign and automation. Concepts, methods and tools from business management, computer science and industrial engineering are blended into one comprehensive and inter-disciplinary approach. The presentation is illustrated using the BPMN industry standard defined by the Object Management Group and widely endorsed by practitioners and vendors worldwide. In addition to explaining the relevant conceptual background, the book provides dozens of examples, more than 230 exercises – many with solutions – and numerous suggestions for further reading. This second edition includes extended and completely revised chapters on process identification, process discovery, qualitative process analysis, process redesign, process automation and process monitoring. A new chapter on BPM as an enterprise capability has been added, which expands the scope of the book to encompass topics such as the strategic alignment and governance of BPM initiatives. The textbook is the result of many years of combined teaching experience of the authors, both at the undergraduate and graduate levels as well as in the context of professional training. Students and professionals from both business management and computer science will benefit from the step-by-step style of the textbook and its focus on fundamental concepts and proven methods. Lecturers will appreciate the class-tested format and the additional teaching material available on the accompanying website.

Ready to join the personal fabrication movement? This hands-on book shows you how to make a wide variety of physical objects with the amazing MakerBot 3D printer. It's handy when you need a replacement for something lost, broken, or no longer made—like a knob on your stove. You can make things instead of buying them, or solve problems with inventions of your own. The possibilities are endless, and MakerBot is the fun, affordable, and inspiring way to go. Get started with your own little factory today! Set up your MakerBot Replicator 2 and understand how it works Learn the basics and print 10 useful objects right away Make objects with sturdy yet biodegradable PLA Get examples of real-world problem solving, from ceiling hooks to hermit crab shells Choose from thousands of free designs on Thingiverse.com—and share your own Repurpose disposable products by making them part of your design Design your own 3D objects, using SketchUp, Autodesk 123D, OpenSCAD, and other tools Use 3D scanning technology to replicate real objects around you

Landmark Text Now Revised and Updated for a New Generation Practical, personal, biblical, and motivational, this bestselling book has been a go-to, definitive guide to intercessory prayer for years. Fully revised and updated, with an in-depth study guide, the fourth edition of this classic text offers new and vital insights on prayer and spiritual warfare. With compassion, strategic thinking, encouragement, and time-tested advice, international prayer leader Cindy Jacobs equips you to be an effective prayer warrior, covering essential topics and answering questions such as: · What is the purpose of intercession? · How do you know someone needs your prayers? · How do you pray? · Do your prayers really battle the enemy and thwart his plans? · What are the "gates" of the enemy? · And more! Whether you are a beginner or an expert intercessor, this training manual has everything you need to pray effectively--and possess the gates of the enemy.

This is the first comprehensive manual that guides the professional and novice through the intricate process of installing, growing, maintaining and designing locks holistically at home or in the salon. You are getting a four part manual with almost 300 pages of detailed instructions on the care of dreadlocks. There are numerous charts, diagrams, schematics, instructions and pictures to guide anyone at any level in the artistry of dreadlocking. If there is one book to buy on the art of creating dreadlocks this is THE one; and, well worth the investment. Used by cosmetologists for training and in CEU instruction within the cosmetology industry.

Lauren Beukes's frighteningly persuasive, high-tech fable that follows four narrators living in a dystopian near-future. Kendra, an art-school dropout, brands herself for a nanotech marketing program. Lerato, an ambitious AIDS baby, plots to defect from her corporate employers. Tendeka, a hot-headed activist, is becoming increasingly rabid. Toby, a roguish blogger, discovers that the video games he plays for cash are much more than they seem. On a collision course that will rewire their lives, these characters crackle with bold and infectious ideas, connecting a ruthless corporate-apartheid government with video games, biotech attack dogs, slippery online identities, a township soccer school, shocking cell phones, addictive branding, and genetically modified art. Taking hedonistic trends in society to their ultimate conclusions, Lauren Beukes spins a tale of a utopia gone wrong, satirically undermining the idea of progress as society's white knight.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

From "Shenadoah" to "Silent Night," and "Amazing Grace" to "Wabash Cannonball," almost every harmonica song becomes bluesy when you play it in second position. In this new book and CD, Jon notates and plays the melodies of almost 100 great public domain songs in the style every one loves the best: second position blues harp. On the 73-minute "CD SongTeacher," Jon demonstrates each song, using multiple embouchures, bends, pull-offs, pull-ons, vibrato, hand flutters, rhythmic chugging, tongue-blocking, octaves and tongue-slaps, 1st, 2nd, 3rd, 4th, 5th and 12th positions, to make these tunes come alive in the language of the blues harp. This program is designed to be a training manual for harp players and a resource of ideas and songs to last a lifetime.
