Key points about language disorders in children Children who have a language disorder have trouble understanding language and communicating. There are 2 kinds of language disorders: receptive and expressive. Children often have both at the same time. A child with a receptive language disorder has ...

Language Disorders in Children

Children with language disorders may feel frustrated that they cannot understand others or make themselves understood, and they may act out, act helpless, or withdraw. Language or speech disorders can also be present with emotional or behavioral disorders, such as attention-deficit/hyperactivity disorder (ADHD) or anxiety.

Language and Speech Disorders in Children | CDC

Language disorders can be acquired at any time during life, usually caused by brain injury or illness. For most children, though, language disorders are developmental. The exact causes of developmental language disorders are unknown, though heredity and prenatal nutrition deficiencies are both possible suspects.
