Introduction to Managerial Accounting, 4/e by Brewer/Garrison/Noreen is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. However, this is not simply a briefer book with chapters removed; B/G/N has been rethought and retooled to meet the needs of the market. B/G/N 4/e is a more accessible, yet thoroughly student-friendly text that satisfies the basic needs of the managerial accounting student without unnecessary depth on advanced topics associated with the follow-up course: cost accounting/cost management. Faculty and students alike will find this new edition has retained the hallmark features of the Garrison brand: author-written supplements, excellent readability, terrific examples, and balanced end-of-chapter material.

The text is current, concise, and clearly written, with cases at the end of each chapter to illustrate the material.* An interactive CD lets students test and expand their understanding with multiple-choice questions, key term matching exercises, demonstrations of various concepts and techniques, critical thinking exercise, interactive cases, and videos.* A dynamic Web site provides test study guides, exercises, games, web testing, relevant articles, from The Wall Street Journal and other sources linked to the text, links to relevant web sites, additional cases, and other materials.

Discover the managerial accounting text written to complement the way you study and learn! CORNERSTONES OF MANAGERIAL ACCOUNTING, 3E, INTERNATIONAL EDITION uses a unique framework to show you the key concepts, or Cornerstones, of accounting. As you come to understand these fundamental calculations, you will develop critical problem-solving skills to make real business decisions.

Explores computer-intensive probability and statistics for ecosystem management decision making Simulation is an accessible way to explain probability and stochastic model behavior to beginners. This book introduces probability and statistics to future and practicing ecosystem managers by providing a comprehensive treatment of these two areas. The author presents a self-contained introduction for individuals involved in monitoring, assessing, and managing ecosystems and features intuitive, simulation-based explanations of probabilistic and statistical concepts. Mathematical programming details are provided for estimating ecosystem model parameters with Minimum Distance, a robust and computer-intensive method. The majority of examples illustrate how probability and statistics can be applied to ecosystem management challenges. There are over 50 exercises - making this book suitable for a lecture course in a natural resource and/or wildlife management department, or as the main text in a program of self-study. Key features: Reviews different approaches to wildlife and ecosystem management and inference. Uses simulation as an accessible way to explain probability and stochastic model behavior to beginners. Covers material from basic probability through to hierarchical Bayesian models and spatial/ spatio-temporal statistical inference. Provides detailed instructions for using R, along with complete R programs to recreate the output of the many examples presented. Provides an introduction to Geographic Information Systems (GIS) along with examples from Quantum GIS, a free GIS software package. A companion website featuring all R code and data

used throughout the book. Solutions to all exercises are presented along with an online intelligent tutoring system that supports readers who are using the book for self-study.

The authors have kept the text concise by focusing on the key concepts students need to master. Opening vignettes & 'in action' boxes show realistic applications of these concepts throughout. Comprehensive end-of-chapter problems provide students with all the practice they need to fully learn each concept.

Success in Accounting starts here! Horngren's Accounting presents the core content of an accounting fundamentals course in an effective and modern format designed to help today's learners succeed. Students learn, within an Australian business context, how financial decision-making is based on accurate and complete accounting information.
